The federal government operates six major health care programs that serve nearly 100 million Americans. Collectively, these programs significantly influence how health care is provided by the private sector. Leadership by Example explores how the federal government can leverage its unique position as regulator, purchaser, provider, and research sponsor to improve care - not only in these six programs but also throughout the nation â € ™s health care system. The book describes the federal programs and the populations they serve: Medicare (elderly), Medicaid (low income), SCHIP (children), VHA (veterans), TRICARE (individuals in the military and their dependents), and IHS (native Americans). It then examines the steps each program takes to assure and improve safety and quality of care. The Institute of Medicine proposes a national quality enhancement strategy focused on performance measurement of clinical quality and patient perceptions of care. The discussion on which this book focuses includes recommendations for developing and pilot-testing performance measures, creating an information infrastructure for comparing performance and disseminating results, and more. Leadership by Example also includes a proposed research agenda to support quality enhancement. The third in the series of books from the Quality of Health Care in America project, this well-targeted volume will be important to all readers of To Err Is Human and Crossing the Quality Chasm - as well as new readers interested in the federal government â € ™s role in health care.

The CMS Compliance Crosswalk: Clear Analysis and Advice for Meeting the Conditions of Participation and Related Accreditor Standards The latest incarnation of HCPro's renowned and respected accreditation crosswalk provides the next generation in healthcare standards compliance. This new edition provides hospitals with the tools to comply with the Centers for Medicare & Medicaid Services (CMS) and understand the Conditions of Participation (CoP) and Interpretive Guidelines. Plus, it correlates each CoP with The Joint Commission and other accreditors' standards, providing the only resource you need to assess compliance and stay in a constant state of readiness for unannounced surveys. Using a table format, the book takes readers through each CoP, explains how accreditation standards differ from the CMS requirements, and offers tips and documentation suggestions for survey preparation.

As more people live longer, the need for quality long-term care for the elderly will increase dramatically. This volume examines the current system of nursing home regulations, and proposes an overhaul to better provide for those confined to such facilities. It determines the need for regulations, and concludes that the present regulatory system is inadequate, stating that what is needed is not more regulation, but better regulation. This long-anticipated study provides a wealth of useful background information, in-depth study, and discussion for nursing home administrators, students, and teachers in the health care field; professionals involved in caring for the elderly; and geriatric specialists.
