Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Real Language Series General Editors- Jennifer Coates, Jenny Cheshire and Euan Reid This is a sociolinguistic series about the

relationships between language, society and social change. Books in the series draw on natural language data from a wide range of social contexts. The series takes a critical approach to the subject, challenging current orthodoxies, and dealing with familiar topics in new ways. The topic of plagiarism is a highly contentious issue and one that is of growing interest and importance in higher education across the world. *Stolen Language? Plagiarism in Writing* uncovers the reasons why students plagiarize, and explains what can be done about it. It challenges the concepts of original authorship of language, tracing the notion of plagiarism to the introduction of copyright laws in the eighteenth century. The analysis presented in this book explores plagiarism as complex and contested, and suggests that in student academic writing it may be the surface manifestation of learning difficulties related to the educational environment, the nature of academic discourse and the nature of language. Underlying the concept of plagiarism is the premise that meaning is made by the individual, using the system of language at his or her disposal. The words and ideas then belong to the individual who first thought of them, or who first used these words in a particular way. New understandings, that language and cognition are fundamentally social and cultural, contest the idea of 'original thought' or 'original language'. In addition, what constitutes plagiarism differs depending on the genre and context of writing. *Stolen Language* shows that there is in any good writing an authorial presence, an authorial voice which is particularly difficult for the novice writer to control when constructing an essay based on multiple texts. Written in a unique and accessible way, the book also looks at the particular difficulties experienced by writers of English as an additional language and provides a practical framework for academics and teachers of writing on how to develop authorial voice and critical thinking in the student writer.

Haynes offers the best coverage for cars, trucks, vans, SUVs and motorcycles on the market today. Each manual contains easy to follow step-by-step instructions linked to hundreds of photographs and illustrations. Included in every manual: troubleshooting section to help identify specific problems; tips that give valuable short cuts to make the job easier and eliminate the need for special tools; notes, cautions and warnings for the home mechanic; color spark plug diagnosis and an easy to use index.

KLR650 (2008-2012),

KX60 (1983-2002), KX80 (1983-1990)

With a Haynes manual, you can do it yourself—from simple maintenance to basic repairs. Haynes writes every book based on a complete teardown of the motorcycle.
