2003 Mitsubishi Eclipse GT The car is a 2003 Mitsubishi spyder eclipse. For the year make and over 150,000 miles it still runs pretty good. Great for traveling. Unfortunately I have a lot of rust from it being in Minnesota with all the salt but I still love my car. The convertible top needs some fixing as well.

The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

A fascinating look inside the preparation of the cars and the making of the movie scenes featured in the 2001 box office hit The Fast and the Furious and in the 2003 summer release sequel The Fast and the Furious 2. Officially authorized by Universal Studios, this book draws on the experience of Eddie Paul in acquiring, constructing and modifying the cars for both movies. This book, with 300 color illustrations, reveals how the automotive stunts were choreographed, performed and filmed. This is a true insider's guide to the exciting world of fast cars, thrilling stunts, and motion-picture production.
