Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles evaluates various technologies and methods that could improve the fuel economy of medium- and heavy-duty vehicles, such as tractor-trailers, transit buses, and work trucks. The book also recommends approaches that federal agencies could use to regulate these vehicles' fuel consumption. Currently there are no fuel consumption standards for such vehicles, which account for about 26 percent of the transportation fuel used in the U.S. The miles-per-gallon measure used to regulate the fuel economy of passenger cars. is not appropriate for medium- and heavy-duty vehicles, which are designed above all to carry loads efficiently. Instead, any regulation of medium- and heavy-duty vehicles should use a metric that reflects the efficiency with which a vehicle moves goods or passengers, such as gallons per ton-mile, a unit that reflects the amount of fuel a vehicle would use to carry a ton of goods one mile. This is called load-specific fuel consumption (LSFC). The book estimates the improvements that various technologies could achieve over the next decade in seven vehicle types. For example, using advanced diesel engines in tractor-trailers could lower their fuel consumption by up to 20 percent by 2020, and improved aerodynamics could yield an 11 percent reduction. Hybrid powertrains could lower the fuel consumption of vehicles that stop frequently, such as garbage trucks and transit buses, by as much 35 percent in the same time frame.

This book offers a comprehensive look at an industry that plays a growing role in motor vehicle production in the United States.

Take an illustrated, historical look at the fire trucks that elevate water and firefighters via hydraulic platforms and ladders at a fire scene, the aerials. Inside is a comprehensive look at all manufacturers of aerials through text and captions that give you a brief overview of early aerials, then concentrates on the trucks in use today (1950 to 1999). Photos show fire trucks in action, in posed shots, and details of their equipment.

Hanna is a talented pianist. When the Budapest Jews are rounded up and sent to Auschwitz, Hanna and her mother and sister are separated from her father. Her mother becomes increasingly mentally ill until she too is taken away somewhere. Her sister Erika is slowly starving to death. Presented with the opportunity to play piano for the camp commander, Hanna is desperate to be chosen. Before she knows it she has fallen in love with the wrong boy.
