Not to be confused with Japanese honeysuckle, which is highly invasive, trumpet honeysuckle is a perennial flowering vine with crimson flowers. I have this plant on my property. We enjoy the trumpet-like flowers that the vine produces during the summer months, and so do the mockingbirds that visit our property.

The Wine Lover's Daily Calendar 2015 is a year-long collection of insight and eclectica for the passionate wine lover. Throughout the year, you will find information on all of the following topics: the language of wine, wine grapes, wine and food, the geography of wine, people that make wine, and weekend wine adventures. This daily calendar uses hundreds of years of tradition, tasting notes, recipes, and colorful trivia to inspire the oenophile in all of us.

At the end of each round, the FAO Statistics Division reviews and assesses national census practices, methodologies and results, and summarizes the findings in

methodological publications, under the Statistical Development Series (SDS). The SDS 17, i.e. this first publication, is a compendium of reviews of country agricultural censuses conducted during the WCA 2010 round (which covers the period 2006–2015) and their main results. This publication includes detailed metadata on agricultural censuses conducted by different countries. Apart from providing information on historical background, legal, institutional frameworks and international collaboration, the publication also provides an overview of the census staff, reference and enumeration periods, scope and coverage, methodological modalities, frame, data collection methods, questionnaires used, new technology used, data processing and archiving,

and census data quality and dissemination. The metadata reviews are complemented by tables with main results on key structural characteristics, such as number of holdings, total area of holdings, area irrigated, machinery, gender, and sex of holders, number of household members, farm labor, livestock, and crop areas. This review of the WCA 2010 round is intended to serve as useful reference material for census planners and data users, providing valuable lessons for future censuses, which will ultimately lead to improved assessments of countries' agricultural sectors.
