Rick Lasky and John Salka are two of the most dynamic and inspirational leaders in the fire service. Their book, Five Alarm Leadership, is a compilation of leadership lessons learned, situations handled, decisions made, and problems solved during their combined 60-plus years of fire service experience. Also included is a special introduction by Chief (ret.) Bobby Halton, Editor-in-Chief of Fire Engineering magazine, outlining the nature of transformational leadership

and its power to inspire excellence in the fire service.

Over the past sixty years, the spectacular growth of the technologies associated with the computer is visible for all to see and experience. Yet, the science underpinning this technology is less visible and little understood outside the professional computer science community. As a scientific discipline, computer science stands alongside the likes of molecular biology and cognitive science as one of the most significant new sciences of the post Second World War era. In this Very Short Introduction, Subrata Dasgupta sheds light on these lesser known areas and considers the conceptual basis of computer science. Discussing algorithms, programming, and sequential and parallel processing, he considers emerging modern ideas such as biological computing and cognitive modelling, challenging the idea of computer science as a science of the artificial. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.
