Advanced Biology by Michael J. Reiss, 9780174387329, available at Book Depository with free delivery worldwide.

The major new course text has been written by experienced authors to provide coverage of the Advanced Subsidiary (AS) and Advanced GCE Biology and Human Biology specifications in a single book. Advanced Biology provides clear, well-illustrated information, which will help develop a full understanding of biological structure and function and of relevant applications. The topics have been carefully organised into parts, which give a logical sequence to the book. This new text has been developed to replace the best-selling titles Biology: Principles and Processes and Biology, A Functional Approach. Features include: full-colour design with clear diagrams and photographs; up-to-date information on biotechnology, health, applied genetics and ecology; clearly written text using the latest Institute of Biology terminology; a useful summary and a bank of practice questions at the end of every chapter; support boxes help bridge the gap from GCSE or equivalent courses; extension boxes providing additional depth of content - some by guest authors who are experts in their field; and a comprehensive index so you can quickly locate information with ease. There is also a website providing additional support that you can access directly at www.advancedbiology.co.uk.

An accessible resource that can be used alongside the Advanced Biology text or any other core Advanced Biology text, as it covers the practical element for AS and A Level Biology.

NO description available

Biology for Life is the leading text for 14-16 year olds in Caribbean schools. This flexible, attractive text is clear and easy to read, providing material for a wide range of abilities. Biology for life contains practical investigations which give clear instructions, and allow students to work independently of the teacher.

Providing a course for the practical element present in A/AS Level Biology syllabuses, this book is designed to be used alongside any other core book. It contains over 170 practical investigations, ideas for practical work, boxes giving advice on specific techniques and questions at the end of chapters to help students to consolidate what they have learned.

The major new course text has been written by experienced authors to provide coverage of the Advanced Subsidiary (AS) and Advanced GCE Biology and Human Biology specifications in a single book. Advanced Biology provides clear, well-illustrated information, which will help develop a full understanding of biological structure and function and of relevant applications. The topics have been carefully organised into parts, which give a logical sequence to the book. This new text has been developed to replace the best-selling titles Biology: Principles and Processes and Biology, A Functional Approach. There is also a website providing additional support that you can access directly at www.advancedbiology.co.uk.

This volume offers full coverage of the A-level Biology syllabus within a single comprehensive text book. Experts in specific aspects of the subject provide items on areas of special interest and controversial issues, encouraging student discussion and providing opportunities for in-depth study.

In Parisian Home Cooking, Michael Roberts offers a look at how real people shop, cook, and eat in the City of Lights. The side streets and markets of Paris come alive with anecdotes about traditional recipes and the daily shopping. Each chapter takes a trip to a different part of the market, with descriptions of the shopkeepers and their goods. And more than 150 recipes document the meals that many Parisians know by heart and consider their daily fare. This isn't fancy restaurant cooking that is difficult to duplicate in the home kitchen, but rather wholesome, easy-to-make recipes, most of which take less than thirty minutes to prepare. Take your pick from Smothered Duck Legs and Apples, Baked Tomatoes with Pesto, and Stuffed Cod with Asparagus. Indulge yourself in Lamb and Red Bean Stew, Tuna Braised in Sherry with Rosemary, or Parisian Bread Pudding. From cover to cover, Parisian Home Cooking is a delicious way to bring a bit of everyday Paris into your own home.

Jordan Peterson is a Canadian clinical psychologist, cultural critic, and professor of psychology at the University of Toronto. His main areas of study are in abnormal, social, and personality psychology, with a particular interest in the psychology of religious and ideological belief, and the assessment and improvement of personality and performance. Peterson grew up in Fairview, Alberta. He earned a B.A. degree in political science in 1982 and a degree in psychology in 1984, both from the University of Alberta, and his Ph.D. in clinical psychology from McGill University in 1991. He remained at McGill as a post-doctoral fellow for two years before moving to Massachusetts, where he worked as an assistant and an associate professor in the psychology department at Harvard University. In 1998, he moved to the University of Toronto as a full professor. He authored Maps of Meaning: The Architecture of Belief in 1999, a work in which examined several academic fields to describe the structure of systems of beliefs and myths, their role in the regulation of

emotion, creation of meaning, and motivation for genocide. In 2016, Peterson released a series of videos on his YouTube channel in which he criticized the Canadian government's Bill C-16. He subsequently became involved in a controversy that received significant media coverage.
