NEW YORK TIMES BESTSELLER! The Beatles, Ed Sullivan and the Author Ed first learns I have written a book when I hand him a finished manuscript. Naively, I imagine he'll be flattered, but when he reads it, he blows his stack and stops speaking to me. He's furious. I am revealing more about him, more backstage gossip and more details about the inner workings of the show than he wants made public. Fortunately for me and for Always On Sunday, Ed simmers down eventually and decides my unauthorized biography is "magnificent." He promotes it in his newspaper column, in interviews and in joint television appearances with me. Ed helps turn the book he initially hated into a national bestseller. During my 11 years on the Sullivan show, no one created more excitement than the Beatles. February 7, 1964: Kennedy Airport. Their first trip to the United States. The screaming fans! The haircuts! The sassy answers! Welcome to New York! The entire country focuses on this place and these young men. Including me. I am meeting their plane. A CBS public relations executive for years. Now the network's press representative on "The Ed Sullivan Show." Ed was warned not to sign the Beatles: "You're crazy! No British group has ever made it big in this country." A month before they arrive, they are still unknown in America. Every reporter I contact turns down my invitation to go with me to JFK. Two weeks later, "I Want To Hold Your Hand" rockets to the top of the charts. Beatlemania crosses the Atlantic, and I am besieged by thousands of ticket requests. Reporters plead to join me at JFK. On February 14, I greet the Beatles again, this time in Miami for a second Sullivan show. I do my best to stay out of the way but, thanks to paparazzi determined to cash in on every shot of the Fab Four, I appear in photos published around the world (including the NY Post). In the captions I am called a Beatle, a case of mistaken identity I still laugh about with my wife, best-selling novelist Ruth Harris. When I return to New York, Ed searches for me backstage. One stagehand is impressed. "Ed must really like you," he says. "You've only worked for him for four years, and he already knows your name." Ed And The Celebrities Who Loved Him -- Or Not! Why did Frank Sinatra take out an ad saying, "Ed, you're sick, sick, sick."? You'll find out in Always On Sunday. Why did Mary Tyler Moore sue "The Ed Sullivan Show"? “ POWERFUL! BRILLIANT! Slick and sexy! Written by pros who know how to tell a story. ” —Publisher's Weekly Zeb Marlowe, the physically scarred and psychologically maimed survivor of a top secret CIA mind-control experiment, has begun to remake his life when Jai Jai Leland, the beautiful widow of a man who didn't survive, asks him to help her solve the mystery behind her husband's shocking death. Marlowe, struggling to resist his attraction to Jai Jai, is pulled into her dangerous quest despite himself. Together they search for rogue psychiatrist, Dr. Victor Ressid, creator of the diabolical experiments that ravaged Marlowe ' s mind and turned ordinary, decent people into terrorists. " —Publisher's Weekly Brainwashed is based on real-life psychiatric experiments known by the code name MK-ULTRA and conducted by the CIA in the 1950's and 1960's. MKUltra involved the use of various methodologies to manipulate mental states and alter brain function, including the surreptitious administration of drugs (including LSD) and other chemicals, hypnosis, sensory deprivation, isolation, verbal and sexual abuse, as well as various forms of torture. Although the CIA insists that MKUltra-type experiments have been abandoned, some CIA observers say there is little reason to believe it does not continue today under a different set of acronyms. (This information is quoted from Wikipedia.) Prosopagnosia: As a consequence of volunteering to take part in the MK-ULTRA experiments, Zeb Marlowe suffers from a neurological disorder that causes face blindness called prosopagnosia. Prosopagnosia is a cognitive disorder in which the ability to recognize faces is impaired, while other aspects of visual processing (e.g., object discrimination) and intellectual functioning (e.g., decision making) remain intact. According to the Prosopagnosia Research Center at Harvard and University College London, "Prosopagnosics often have difficulty recognizing family members, close friends, and even themselves. They often use alternative routes to recognition, but these routes are not as effective as recognition via the face." Oliver Sacks, a professor of neurology at the N.Y.U. School of Medicine and the author of "Awakenings," writes about the current science and his own experiences and strategies in living with prosopagnosia at [newyorker.com/magazine/2010/08/30/face-blind?intcid=mod-most-popular](http://newyorker.com/magazine/2010/08/30/face-blind?intcid=mod-most-popular) Leslie Stahl reported on prosopagnosia on 60 Minutes.
