Taureans, ever wondered what the Sun-signs tell you about love and life? This unique anthology of poems for love and life relates directly to your Sun-sign, Taurus. If you were born between the 21st of April and the 21st of May, you will relate to many of the themes identified with your sign's characteristics and personality traits. The poems in this collection have been chosen because they reflect a Taurean attitude to life. They appeal to the interests 'ruled' by your sign; the animals, flowers, trees, plants and places celebrated by the poets and associated with the sign of Taurus over three thousand years of traditional astrology. Some have been chosen simply because we believe you will enjoy them, and that they will awaken or re-awaken your love of poetry.

USA's historie fra 1450-1877 samt kolonisationen af Amerika. Medtager kildeskifter af historisk interesse fra perioden

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

What do prisoner laborers, graduate students, welfare workers, and college athletes have in common? According to sociologist Erin Hatton, they are all part of a growing workforce of coerced laborers. Coerced explores this world of coerced labor through an unexpected and compelling comparison of these four groups of workers, for whom a different definition of "employment" reigns supreme—one where workplace protections do not apply and employers wield expansive punitive power, far beyond the ability to hire and fire. Because such arrangements are common across the economy, Hatton argues that coercion—as well as precarity—is a defining feature of work in America today. Theoretically forceful yet vivid and gripping to read, Coerced compels the reader to reevaluate contemporary dynamics of work, pushing beyond concepts like "career" and "gig work." Through this bold analysis, Hatton offers a trenchant window into this world of work from the perspective of those who toil within it—and who are developing the tools needed to push back against it.

"On the basis of a superficial inspection, Traditions & Encounters might look similar to several other textbooks that survey the world's past. Like other books, for example, Traditions & Encounters examines the historical development of societies in Asia, Europe, Africa, the Americas, and Oceania. Yet Traditions & Encounters differs from other works in two particularly important ways. First, it relies on a pair of prominent themes to bring a global perspective to the study of world history: it traces the historical development of individual societies in all world regions, and it also focuses attention systematically on interactions between peoples of different societies. Second, it organizes the human past into seven eras that represent distinct and coherent periods of global historical development"--Preface (Page xvi).
