At the Bottom of the River is a collection of short stories by Caribbean novelist Jamaica Kincaid. Published in 1983, it was her first short story collection. The collection consists of ten inter-connected short stories, seven of which were previously published in The New Yorker and The Paris Review between 1978 and 1982. Kincaid was awarded the Morton Dauwen Zabel Award of the American Academy and Institute of Arts and Letters in 1983 for the collection.

The floor of the valley is accessible by foot, muleback, or by boat or raft from upriver. Hiking down to the river and back up to the rim in one day is discouraged by park officials because of the distance, steep and rocky trails, change in elevation, and danger of heat exhaustion from the much higher temperatures at the bottom. Rescues are required annually of unsuccessful rim-to-river-to-rim travelers.

Mitty Andersen knows that rising blues star Bobby Tarleton didn't die of a heroin overdose. He'd blown enough blues harmonica notes with Bobby to know that he would never let anything get in the way of his music. So when he gets the news in the middle of his blues set at Little Queenie's, he suspects a cover-up-and he's determined to put his ex-investigative reporter skills to work to find out what really happened. Mitty hits the blues circuit with his "partner in chime," Pete Bolden, and rounds up a posse disguised as a blues band. They gig the juke joints and blues bars throughout Southeast Texas and Louisiana, hoping to uncover the truth about Bobby T's death. It doesn't take long for Mitty to figure out that Bobby T just might be the latest in a decades-long string of serial murders aimed at eliminating "those who play the Devil's music." Now Mitty must race against the clock to put an end to the madness before another harmonica player succumbs to a deranged psychopath who has managed to avoid capture for far too long.

"A vivid historical account—Thompson shines in giving a sense of what it means to love a place that's been designated a 'sacrifice zone.'" —PUBLISHERS WEEKLY Award—winning investigative environmental journalist Jonathan P. Thompson digs into the science, politics, and greed behind the 2015 Gold King Mine disaster, and unearths a litany of impacts wrought by a century and a half of mining, energy development, and fracking in southwestern Colorado. Amid these harsh realities, Thompson explores how a new generation is setting out to make amends. JONATHAN THOMPSON is a native Westerner with deep roots in southwestern Colorado. He has been an environmental journalist focusing on the American West since he signed on as reporter and photographer at the Silverton Standard & the Miner newspaper in 1996. He has worked and written for High Country News for over a decade, serving as editor-in-chief from 2007 to 2010. He was a Ted Scripps fellow in environmental journalism at the University of Colorado in Boulder, and in 2016 he was awarded the Society of Environmental Journalists' Outstanding Beat Reporting, Small Market. He currently lives in Bulgaria with his wife Wendy and daughters Lydia and Elena.

Growing up near the Sabine, journalist Wes Ferguson, like most East Texans, steered clear of its murky, debris-filled waters, where alligators lived in the backwater sloughs and an occasional body was pulled

Get Free At The Bottom Of River Jamaica Kincaid

from some out-of-the-way crossing. The Sabine held a reputation as a haunt for a handful of hunters and loggers, more than a few water moccasins, swarms of mosquitoes, and the occasional black bear lumbering through swamp oak and cypress knees. But when Ferguson set out to do a series of newspaper stories on the upper portion of the river, he and photographer Jacob Croft Botter were entranced by the river's subtle beauty and the solitude they found there. They came to admire the self-described "river rats" who hunted, fished, and swapped stories along the muddy water—plain folk who love the Sabine as much as Hill Country vacationers love the clear waters of the Guadalupe. Determined to travel the rest of the river, Ferguson and Botter loaded their gear and launched into the stretch of river that charts the line between the states and ends at the Gulf of Mexico.

While an elderly couple worries about their home being taken from them through an act of eminent domain, their son struggles to find his place in a new romantic relationship and the duty to his family.

The Zambezi river is the fourth longest in Africa, crossing or bordering Zambia, Angola, Namibia, Botswana, Zimbabwe and Mozambique. The river basin is widely recognised as one of the most important basins in southern Africa and is the focus of contested development, including water for hydropower and for agriculture and the environment. This book provides a thorough review of water and sustainable development in the Zambezi, in order to identify critical issues and propose constructive ways forward. The book first reviews the availability and use of water resources in the basin, outlines the basin's economic potential and highlights key concerns related to climate vulnerability and risk. Focus is then devoted to hydropower and the water-energy-food (WEF) nexus, sustainable agricultural water management, and threats and opportunities related to provision of ecosystem services. The impact of urbanisation and water quality is also examined, as well as ways to enhance transboundary water cooperation. Last, the book assesses the level of water security in the basin, and provides suggestions for achieving Sustainable Development Goal (SDG) 6. Throughout, emphasis is placed on entry points for basin-level management to foster improved paths forward.
