In November 1990 Indo-American Hybrid Seeds (IAHS), one of the largest and very innovative horticultural enterprises of its kind in India, celebrated its silver jubilee year in the town of Bangalore, India. On the occasion of this silver jubilee of IAHS an International Seminar on 'New Frontiers in Horticulture' was organized from 25-28th of November 1990 at the Ashok Radisson Hotel in Bangalore. IAHS was almost fully responsible in terms of organization and financially for this International Seminar. Assisted by an International Scientific Advisory Board, the organizing committee, all members of the company IAHS, really did a great job. I would like to thank in particular Mr. Mamohan Attavar (the company's founder) and Mr. Sri N.K. Bhat (partner of the company), respectively chairman and treasurer of the organizing committee, for their organizational and financial support in organizing this conference. Very special words of thanks go to my colleague editor, Dr. Jitendra Prakash, Secretary Organizing committee and Director of Biotechnology - IAHS, who was really the spill in the whole organization of our very successful conference.

Designed for the course on Farm Machinery for undergraduate students of Agricultural Engineering, the book deals with the field operations such as tillage, tillage machineries including seedbed refining machineries, sowings and planting machineries, weeding and interculture equipment. A variety of harvesting and threshing equipment for cereals and forage crop including recovery/handling of crop residue are also dealt with in detail. The book discusses machineries used for specialised crops like rice, potato and sugarcane which are the major crops grown in our country. A detailed procedure on estimation of operational cost of agricultural machineries find place in this text. Review questions, multiple choice questions and solved numerical problems are suitably placed at the end of each chapter, wherever required, to help students to check their knowledge and grasping of the subject. Efforts have been made to write this book conforming to the course curriculum to enable students to use this book as a text. The tools, implements or machineries have been described in a simple language supported with line diagrams and photographs for better understanding. The students will find this book valuable for their continuing education as well as for various competitive examinations. Besides B.Tech (Agricultural Engineering) students, the book is also beneficial for the students of Diploma in Agricultural Engineering and B.Sc. Agricultural Sciences for their paper on 'Farm Machinery'.

The book is a comprehensive and need oriented volume encompassing the latest and balanced information about various aspects of fruit culture (tropical & subtropical). Following is a sampling of topics covered. Introductory on Fruit Industry deals briefly with production statistics, social, nutritive and industrial relevance and importance of fruit production. Second provides a complete overview of all principles and practices associated with Orchard planning, Layout and Management in a very abridged manner. The third on Classification of fruit crops includes botanical, horticultural and environmental grouping in a very precise but meaningful manner. Following s give a detailed account on different aspects including origin, distribution, botany & varieties, classification, climate & soil requirements, propagation, cultivation methods, flowering, harvesting, post harvest methods and crop protection of different fruit crops coming under each group such as tropical, subtropical and arid & semi-arid fruits. IV is on tropical fruits - Banana, Guava, Mangosteen, Papaya Pineapple and Sapota. V is on ten major subtropical fruits Avocado, Citrus, Grapes, Litchi, Loquat, Mango, Olive, Passion fruit, Persimmon and Pomegranate. VI contains details of eight major arid & semi-arid fruit crops namely, Aonla, Ber, Custard apple, Date, Fig, Jack, Jamun and Phalsa. Apart from these major fruit crops, VII gives a brief but comprehensive account on a large number of under and un - exploited fruit crops of tropical and subtropical parts of the world. This gives details of well-known minor fruits and a list of other very less known fruit species, which can be made the subject of detailed study for further utilization and information generation. Information provided in this compilation will be of use to students, teachers, scientists, extension workers, orchardists and others interested in fruit culture.

The book entitled "Objective Horticulture" has arisen from the fact that there is no objective type book covering all disciplines of horticulture (Fruit Science, Vegetable Science and Floriculture) as per revised syllabus prescribed by the ICAR. The book has been divided into 5 main sections viz; Section-I: Horticulture-Fruit Science Section-II: Horticulture-Vegetable Science Section-III: Horticulture-Floriculture Section-IV: Important terms used in horticulture Section-V: Miscellaneous. This book will help all and serve as a comprehensive guide to those who want to prepare for competitive examinations like M.Sc. and Ph.D admission in Agricultural/Horticultural Universities, ICAR Institutes and other competitive examinations viz; ARS, SRF, JRF, Civil Services held at National and State level services. It is earnestly hoped that the students of Horticulture (fruit science, vegetable science and floriculture and post harvest technology) will find this book quite useful and prove beneficial to its readers.

This book traces the growth of gardens, their history and development and provides information on the various principal horticultural practices, taxonomy and its significance, floriculture, bonsai, bottle or dish gardens, floral decorations like lkebana,
