Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing

and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

An Arduous Climb narrates the extraordinary story of Kelsey Atangamuerimo Harrison, who rose from humble origins in the creeks of Niger Delta of Nigeria to become a leading obstetrician, respected scholar, inspirational teacher, conscientious Vice Chancellor of the University of Port Harcourt, and recipient of several honours,

including Nigeria's highest honour for intellectual accomplishment. Told with remarkable candour, the book narrates how the chaos, corruption, violence and intrigues during his tenure as the Vice Chancellor of the University of Port Harcourt were often overwhelming, and nearly ruined his personal life. His experiences during the Civil War (1967-1970), in particular his deep involvements with the rehabilitation of maternity services in his home state of Rivers after the war, are very illuminating.

Kelsey

Harrison was born in the Niger Delta of Nigeria in 1933 and qualified as an obstetrician and gynaecologist from University College Hospital London in 1964. He taught variously at the University of Ibadan, Ahmadu Bello University, Zaria, and the University of Port Harcourt, where he eventually became the Vice Chancellor. Widely regarded as one of the leading obstetricians in the world, he was in 1989 awarded Nigeria's highest honour for intellectual attainment, the Nigerian National Order of Merit. A passionate cricketer, he retired in 1998, and now lives in Finland with his second wife.

changed to, say, Korean. In tune with iTunes. iTunes can do far more than your father's jukebox. Learn how to pick and choose which parts of your iTunes library loads onto your iPod, how to move your sacred iTunes Folder to a bigger hard drive, and how to add album covers to your growing collection. The power of the 'Pod. Download movies, play photo slideshows, find cool podcasts, and more: this book shows you how to unleash all your iPod's power. iPod is simply the best music player available, and this is the manual that should have come with it.

The old masters of dealt only with the static features of the positional rules of chess. But these are insufficient to explain the basics of chess. The problem is that chess, like in other sciences, has undergone a dynamic revolution, but chess literature doesn't yet reflect it. In this major work Aagaard accessibly explains the rules of attack (the exploitation of a dynamic advantage), balanced between understandable examples, and deep analysis. Five years in the making, this book deals with weak kings, sacrifices, various minor attacking themes, intuitive sacrifices, opposite castling, modern king hunts, and enduring initiative.

In the face of growing needs and problems around urbanization, the sustainable development of cities does not lie only in technology, research and innovation. Sustainable local development also results from a combination of different elements related to the development of social cohesion, the local economy, the environment and culture; also, crucially, it depends on the autonomy of local authorities and the adoption of the most appropriate system of governance. In addition, the urgent need to create better and more liveable cities

is now inextricably linked with the integration of environmental principles, in order to prevent the waste of resources and mitigate climate change by restricting CO2 emissions. Within this framework, new strategies have been implemented for the development of 'New Towns' or satellite cities.
 This publication gathers together contributions from different experts involved in the EAST (Euro Asia Sustainable Towns) project. The contributors originate from India, China, Switzerland, Germany, the Netherlands, the United States and France, and come from a variety of different backgrounds, including academic researchers, urban planners, architects, political scientists and practitioners.
