Just loosen the bolts holding the brake pads in place with an Allen wrench, and move the pads up or down so they're centered on the rim. Then, retighten the brake pads with your wrench. You might also need to adjust your brake cables if your brake levers hit the grip on the handlebars when you pull on them, which is a sign that the cables are too loose.

Depress the brake lever to secure pads against the rotor and maintain pressure. This will move caliper so pads are aligned to rotor. Inspect caliper and brake pad pistons. Push caliper left or right until pistons appear centered over rotor. Maintain pressure on the rotor and tighten the caliper mounting bolts.

Step 1: Access the drum brake adjustment star

Acces PDF Brake Pads Manual

wheel. The drum brake adjuster is located under an access cover in the back of the drum brake. Using the screwdriver, gently pry out the rubber grommet that protects this access cover. Step 2: Adjust the star wheel. Turn the star-shaped adjuster a few times.

The 6th Edition of TODAY'S TECHNICIAN: AUTOMOTIVE BRAKE SYSTEMS is a comprehensive text that equips readers to confidently understand, diagnose, and repair today's brake systems. Using a unique two-volume approach, the first volume (Classroom Manual) details the theory and application of the total brake system, subsystem, and components, while the second (Shop Manual) covers real-world symptoms, diagnostics, and repair information. Known for its comprehensive coverage, accurate and up-to-date details, and abundant illustrations, the text is an ideal resource to prepare for success as an automotive technician or pursue ASE certification. Now updated with extensive information on new and emerging technology and techniques—including hybrid vehicles, brake by wire, and electric brakes—the Sixth Edition also aligns with the NATEF 2012 accreditation model, including job sheets correlated to specific AST and MAST tasks.
