From basic concepts to research grade material, Mobile Web 2.0: Developing and Delivering Services to Mobile Devices provides complete and up-to-date coverage of the range of technical topics related to Mobile Web 2.0. It brings together the work of 51 pioneering experts from around the world who identify the major challenges in Mobile Web 2.0 applications and provide authoritative insight into many of their own innovations and advances in the field. To help you address contemporary challenges, the text details a conceptual framework that provides modeling facilities for context-aware, multi-channel Web applications. It compares various platforms for developing mobile services—from the developer and user perspectives—and explains how to use high-level modeling constructs to drive the application development process through automatic code generation. Proposes an expanded model of mobile application context Explores mobile social software as an Information and Communications Technology (ICT) Discusses the effect of context on mobile usability Through empirical study, the book tests a number of hypotheses on the use of software implementation technology and location context in mobile applications. It introduces Reusable End-User Customization (REUC)—a technique that allows users to adapt the layout of Web pages and automatically reapplies those preferences on subsequent visits. It also investigates the need for non-visual feedback with long system response times, particularly when downloading Web pages to mobile devices.

The first book in the field written expressly for veterinary technicians by leaders in the field. Small Animal Emergency and Critical Care, 2nd Edition is efficiently organized for quick access to dozens of common, life-saving protocols and procedures. Section I includes chapters on assessment, equipment, and therapies and techniques. Every procedure is thoroughly illustrated and described in step-by-step detail with important drug information. Section II addresses specific systemic problems such as hematologic, cardiovascular, and gastrointestinal emergencies; shock; and trauma. Total team management of the critical patient is emphasized throughout. Logically organized by physiologic sign to help busy practitioners prioritize interventions Helpful equipment lists are provided at the beginning of most chapters. Technician Tips highlight specific procedures using diagrams, photos, and detailed instructions. New chapters cover isolation of the critically ill, infectious patient; client communication including triage, both in the waiting room and on the phone; and restraint techniques, sampling techniques, and common emergencies related to birds and exotics. Expanded Pain Management, Respiratory Emergencies, and Urologic Emergencies chapters include practical information on a wide variety of presenting problems. Expanded coverage of basic lab equipment, fluid therapy, and oxygen therapy provides the most current information.

Manual Lymph Drainage (MLD) is today an indispensable part of Physical Therapy. This compendium begins by explaining the anatomical and physiological foundations of MLD. Simple, clear diagrams show the lymph pathways, and readers will be brought up to date with more current perspectives on the lymph systems. However, the emphasis is on the practical use of MLD. There is a large section devoted to lymphedema and therapy with photos of several different types of patients. Other chapters of the book are devoted to traumatic injuries, central nervous system disorders, dermatological conditions, rheumatic disorders and arthropathies. Practical aspects of MLD are dealt with in a separate section at the end of the book. Therapy strokes are described and photographed.

The second volume of the Wiley series, Environmentally Conscious Manufacturing focuses on environmentally preferable approaches to manufacturing. Contributors present and discuss the technologies engineers need to specify and employ to make manufacturing operations environmentally friendly and conform to environmental regulations. Chapters cover Hazardous Waste Minimization and Management; Cost-Effective Manufacturing; Real-time Process Monitoring and Control; Ethics in ECM; Governmental Regulations and Policies, and Total Quality Management. In each chapter case studies are provided to guide readers in areas outside their expertise.
