Capital Business Solutions New Orleans Various members of Team CBS taking the ALS Challenge.

Too many entrepreneurs push off planning for the sale of their business until the last moment. But for a business to sell for what it's really worth—or even more—owners need to prepare for the sale from the very start. In *Exit Rich*, author and mergers and acquisitions authority Michelle Seiler Tucker joins forces with Sharon Lechter, finance expert and author of *Rich Dad Poor Dad*, to create a must-have guide for all business owners—whether they're gearing up to sell a business now or just getting started building out their company into something to sell for a profit in the future. Seiler Tucker's twofold approach to selling your business for maximum profit combines two of the most powerful elements of her mergers and acquisitions toolkit: the "ST GPS Exit Model" to help business owners set goals for the sale before their business hit the market, and the "6 P Method" to help them objectively evaluate their business's worth, before their potential buyers do. Combined, these tools provide invaluable insight into the process of preparing a business for sale, finding the right buyers, and staging the sale itself. Throughout the book, Sharon Lechter's wisdom peppers each chapter in the "Mentoring Corner" section, providing forward-thinking entrepreneurs with the perspective that they need to take control of their business's future and exit rich. This book is a rich resource for any business owner looking to:

- Objectively evaluate their business before a sale
- Improve their chances of finding the right buyer
- Sell their business for maximum profit

Sell your business for more than its worth addresses the vital issues that add value to your business as well as increase the sales price potential of your business. This book will define industries that are desirable to buyers and it will open your eyes to discover if your industry is thriving or dying and what you can do about it. This must-read will provide valuable tips on creating congruent profit centers and diversifying your product/client mix. Most important this book is a blueprint for anyone that wants to increase market share, become more profitable and for those that want to, sell their business for top dollar! This extraordinary book will demonstrate how to increase profits, plan your exit strategy and sell your business for maximum value in the quickest time possible in an easy to understand step-by-step approach.

Indexes are arranged by geographic area, activities, personal name, and consulting firm name.

Raising Entrepreneurial Capital begins where entrepreneurship books leave off. This book provides a broad, high-level discussion of the financing decisions that companies must make to achieve success. With a focus on classic capital raising, the text covers the debt vs. equity decision, as well as the options available to smaller businesses. It also describes the factors that lead to rapid growth, including venture capital, IPOs, angels, incubators, and much more. Combining solid theory with practitioner's experience and insights, this book should increase student understanding of how to raise entrepreneurial capital. It explains how your company should position itself to attract private equity investment, and what steps you can take to improve your company's marketability. It includes several chapters on worldwide regional variations on forms and availability of pre-seed capital, incubators, and the business plans they create, with case-studies from Europe, Latin America, and the Pacific Rim. It also effectively differentiates between venture capital and entrepreneurial capital. This book will appeal to entrepreneurs and to students in Entrepreneurship programs, particularly entrepreneurial finance courses. * Combines solid theory with practitioner's experience and insights * Case studies illustrate theory throughout the book * Describes worldwide and regional variations in capital raising strategies

Viewing poverty as a condition that is fed and renewed on a daily basis by social and economic structures, this book focuses on the ways in which poor residents can be helped to improve their own situations, their living conditions, and the central city itself. Also includes four maps.

Sources of financing are arranged by industry, geographic areas, and method of financing.
