Measuring 838 mm in diameter and 285 mm wide, the design offers a tough sidewall to take on the most formidable environments with confidence, and an aggressive off-road tread pattern which provides an iron grip in wet, mud, sand and snow conditions.

Names
The volume seeks to establish socio-onomastics as a field of linguistic inquiry not only within sociolinguistics, but also, and in particular, within pragmatics. The linguistic study of names has a very long history, but also a history sometimes fraught with skepticism, and thus often neglected by linguists in other fields. The volume takes on the challenge of instituting onomastic study into linguistics and pragmatics by focusing on recent trends within socio-onomastics, interactional onomastics, contact onomastics, folk onomastics, and linguistic landscape studies. The volume is an introduction to these fields || with the introductory chapter giving an overview of, and an update on, recent onomastic study || and in addition offers detailed in-depth analyses of place names, person names, street names and commercial names from different perspectives: historically, as well as from the point of view of the impact of globalization and glocalization. All the chapters focus on the use and function of names and naming, on changes in name usage, and on the reasons for, processes in, and results of names in contact.

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African (tradition) that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

"Soon to be a major motion picture"--Cover.

We are facing hugely complex challenges || from climate change to world poverty, our problems are part of an inter-related web of social and natural systems. Human ecology promises an approach to these complex challenges, a way to understand these problems holistically and to start to manage them more effectively. This book offers a coherent conceptual framework for Human Ecology || a clear approach for understanding the many systems we are part of and for how we frame and understand the problems we face. Blending natural, social and cognitive sciences with dynamical systems theory, the authors offer systems approaches that are accessible to all, from the undergraduate student to policy-makers and practitioners across government, business and community. Road-tested and refined over a decade of teaching and workshops, the authors have built a clear, inspiring and important framework for anyone approaching the management of complex problems and the transition to sustainability.

St. Louis, 1927. Prohibition has sparked the engine of organized crime. Fueled by the fortunes of bootlegging, gangsters rule the city though speakeasies - Speakeasies like Lackadaisy. Competition is fierce, and in this city, you're either holding the gun, or taking the bullet. But with all the cunning, tenacity, and sly ingenuity they can muster, the Lackadaisy gang might just have a chance!

Covering a wide range of disciplines, this book explains the formulae, techniques, and methods used in field ecology. By providing an awareness of the statistical foundation for existing methods, the book will make biologists more aware of the strengths and possible weaknesses of procedures employed, and statisticians more appreciative of the needs of the field ecologist. Unique to this book is a focus on ecological data for single-species populations, from sampling through modeling. Examples come from real situations in pest management, forestry, wildlife biology, plant protection, and environmental studies, as well as from classical ecology. All those using this book will acquire a strong foundation in the statistical methods of modern ecological research. This textbook is for late undergraduate and graduate students, and for professionals.

The Land That Time Forgot opens with the discovery near Greenland of a floating thermos flask containing a manuscript by castaway Tyler Bowen, Jr. The document recounts a series of adventures that starts with a sea battle against a German U-boat and ends on a mysterious island populated by hostile prehistoric animals and people. The second part of the book, (The People That Time Forgot,) continues the story with the tale of Tom Billings, who has been sent on a mission to rescue Bowen after his manuscript was discovered. He flies solo over the mountainous cliffs that encircle the island and is attacked by a monstrous flying reptile, forcing him to crash-land. Billings then attempts to make his way on foot back to the rest of his party while contending with dangerous inhabitants from different stages of human development. The final installment of the story, (Out of Time's Abyss,) reveals what happened to Bradley, a crew member who was sent on a scouting expedition earlier in the story and was never heard from again. This trilogy of short novels was originally published serially in 1918 in Blue Book Magazine. In 1924 they were published in a single volume by A. C. McClurg. The Burroughs fan community seems to fall into two camps about whether the story comprises three separate novellas, or whether it's a single novel divided into three parts. This production follows the 1924 edition in combining the three into a single novel. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Somewhere above Equestria floats a cloud city completely hidden from sight by ancient magic. Legend says the hidden kingdom is home to a unique type of Pegasus, along with a mysterious treasure called the Halo of Cirrostrata. As soon as Daring Do learns about it, she can't get her head out of the clouds! She has to see it. But how? Many dangers await those who try to enter the forbidden city of Cirrostrata. Can the brave adventurer find the secret island in the air, even if it means flying blind? © 2016 Hasbro. All Rights Reserved.
