In this book social scientists scrutinize the middle decades of the nineteenth century in Japan. That scrutiny is important and overdue, for the period from the 1850s to the 1880s has usually been treated in terms of politics and foreign relations. Yet those decades were also of pivotal importance in Japan's institutional modernization. As the Japanese entered the world order, they experienced a massive introduction of Western-style organizations. Sweeping reforms, without the class violence or the Utopian appeal of revolution, created the foundation for a modern society. The Meiji Restoration introduced a political transformation, but these chapters address the more gradual social transition. Originally published in 1986. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

This newly revised clearly-presented text looks at Japan's economic history from the nineteenth century through to World War II. Within a framework based on the theories and approaches of Development Studies, it demonstrates the relevance of Japan's pre-war experience to the problems facing developing countries today, and draws out the historical roots of the institutions and practices on which Japan's post-war economic miracle was based. New features include: - fresh theoretical perspectives - additional material derived from new sources - increased number of case studies - fully up-dated references and bibliography. This broad-ranging textbook is both topical and easy-to-use and will be of immense use to those seeking an understanding of Japanese economic development.

Japanese Management and Labour in Transition explores the changing face of Japanese industrial relations. Part one of the work outlines recent trends in Japanese labour markets, labour law and corporate strategy, and explores the responses of both management and labour to pressure posed by these trends. Part two analyses the interaction between the state, management and labour, considering both the macro and the micro levels. This compilation of up-to-date research by leading Japanese scholars challenges the traditional view of 'lifetime' employment and focuses on the growing economic pressures that Japanese management and labour currently face.
