Global Credit Crisis during 2008/2009 has shown that sound understanding of underlying credit risk is crucial. If credit freezes, almost every activity in the economy is affected. The best way to utilize credit and get results is to understand credit risk. *Advanced Credit Risk Analysis and Management* helps the reader to understand the various nuances of credit risk. It discusses various techniques to measure, analyze and manage credit risk for both lenders and borrowers. The book begins by defining what credit is and its advantages and disadvantages, the causes of credit risk, a brief historical overview of credit risk analysis and the strategic importance of credit risk in institutions that rely on claims or debtors. The book then details various techniques to study the entity level credit risks, including portfolio level credit risks. Authored by a credit expert with two decades of experience in corporate finance and corporate credit risk, the book discusses the macroeconomic, industry and financial analysis for the study of credit risk. It covers credit risk grading and explains concepts including PD, EAD and LGD. It also highlights the distinction with equity risks and touches on credit risk pricing and the importance of credit risk in Basel Accords I, II and III. The two most common credit risks, project finance credit risk and working capital credit risk, are covered in detail with illustrations. The role of diversification and credit derivatives in credit portfolio management is considered. It also reflects on how the credit crisis develops in an economy by referring to the bubble formation. The book links with the 2008/2009 credit crisis and carries out an interesting discussion on how the credit crisis may have been avoided by following the fundamentals or principles of credit risk analysis and management. The book is essential for both lenders and borrowers. Containing case studies adapted from real life examples and exercises, this important text is practical, topical and challenging. It is useful for a wide spectrum of academics

“In the fall, I went for walks and brought home bones. The best bones weren’t on trails—deer and moose don’t die conveniently—and soon I was wandering so far into the woods that I needed a map and compass to find my way home. When winter came and snow blew into the mountains, burying the bones, I continued to spend my days and often my nights in the woods. I vaguely understood that I was doing this because I could no longer think; I found relief in walking up hills. When the night temperatures dropped below zero, I felt visited by necessity, a baseline purpose, and I walked for miles, my only objective to remain upright, keep moving, preserve warmth. When I was lost, I told myself stories . . .” So Charles D’Ambrosio recounted his life in Philipsburg, Montana, the genesis of the brilliant stories collected here, six of which originally appeared in *The New Yorker*. Each of these eight burnished, terrifying, masterfully crafted stories is set against a landscape that is both deeply American and unmistakably universal. A son confronts his father’s madness and his own hunger for connection on a misguided hike in the Pacific Northwest. A screenwriter fights for his sanity in the bleak

corridors of a Manhattan psych ward while lusting after a ballerina who sets herself ablaze. A Thanksgiving hunting trip in Northern Michigan becomes the scene of a haunting reckoning with marital infidelity and desperation. And in the magnificent title story, carpenters building sets for a porn movie drift dreamily beneath a surface of sexual tension toward a racial violence they will never fully comprehend. Taking place in remote cabins, asylums, Indian reservations, the backroads of Iowa and the streets of Seattle, this collection of stories, as muscular and challenging as the best novels, is about people who have been orphaned, who have lost connection, and who have exhausted the ability to generate meaning in their lives. Yet in the midst of lacerating difficulty, the sensibility at work in these fictions boldly insists on the enduring power of love. D'Ambrosio conjures a world that is fearfully inhospitable, darkly humorous, and touched by glory; here are characters, tested by every kind of failure, who struggle to remain human, whose lives have been sharpened rather than numbed by adversity, whose apprehension of truth and beauty has been deepened rather than defeated by their troubles. Many writers speak of the abyss. Charles D'Ambrosio writes as if he is inside of it, gazing upward, and the gaze itself is redemptive, a great yearning ache, poignant and wondrous, equal parts grit and grace. A must read for everyone who cares about literary writing, *The Dead Fish Museum* belongs on the same shelf with the best American short fiction.
