startups are attacking and even 'disrupting' incumbents. To stack the odds for success, large corporates have tried to emulate the methods and approaches of greenfield startups.

They set up explorative innovation units (called Innovation Centers, Incubators,

Accelerators, Digital Labs, Innovation Outposts, Fab Labs, Maker Spaces, etc.).

Around the globe there are more than 600 of these. But returns on innovation are decreasing - despite increasing investments into innovation . So apparently there is a problem. We think

that the root cause-
and hence the
Archimedean point for
solving the problem
-lies in one part of the
