Beef up your home's wiring infrastructure and control systems to accommodate the latest digital home products. Upgrade wiring in your existing home room-by-room, system-by-system or wire the home you're building. Learn wiring for the latest digital home technologies -- whole home audio, outdoor audio, VoIP, PA systems, security systems with Web cams, home theater, home networking, alarms, back-up systems, and more. Perfect whether you do your own electrical work or want to talk intelligently to an electrical contractor.

Since the publication of the best-selling first edition of The Satellite Communication Applications Handbook, the satellite communications industry has experienced explosive growth. Satellite radio, direct-to-home satellite television, satellite telephones, and satellite guidance for automobiles are now common and popular consumer products. Similarly, business, government, and defense organizations now rely on satellite communications for day-to-day operations. This second edition covers all the latest advances in satellite technology and applications including direct-to-home broadcasting, digital audio and video, and VSAT networks. Engineers get the latest technical insights into operations, architectures, and systems components.

Advanced Automotive Electricity and Electronics, published as part of the CDX Master Automotive Technician Series, gives students with a basic understanding of automotive electrical the additional knowledge and experience they need to diagnose and fix complex electrical systems and circuits. Focused on a " strategy-based diagnostics " approach, this book helps students master technical trouble-shooting in order to address the problem correctly on the first attempt.

In lively, mordantly witty prose, Negroponce decodes the mysteries--and debunks the hype--surrounding bandwidth, multimedia, virtual reality, and the Internet, and explains why such touted innovations as the fax and the CD-ROM are likely to go the way of the BetaMax. "Succinct and readable. . . . If you suffer from digital anxiety . . . here is a book that lays it all out for you."--Newsday.

Broken Promises is the third book in a trilogy spanning 18 years. Bruce Kushnick, author, senior telecom analyst and industry insider, lays out, in all of the gory details, how America paid over \$400 billion to be the first fully fiber optic-based nation yet ended up 27th in the world for high-speed Internet (40th in upload speeds). But this is only a part of this story. With over four million people filing with the FCC to 'Free the Net', one thing is abundantly clear -- customers know something is terribly wrong. Every time you pay your bills you notice that the price of your services keeps going up, you don't have a serious choice for Internet (ISP), broadband or cable service, much less competitors fighting for your business, or maybe you can't even get very fast broadband service. Worse, over the last few years, America's ISPs and cable companies have been rated "the most hated companies in America". While Net Neutrality concerns (detailed in Broken Promiss) are important, the actions are only a first step and will most likely be tied up in court for the next few years. More importantly, it does not resolve most of the customer issues and there is nothing else on the horizon that will fix what's broken. Broken Promises documents the massive overcharging and failure to properly upgrade the networks, the deceptive billing practices, the harms caused from a lack of competition, the gaming and manipulating of the regulatory system, from the states to the FCC, and exposes the companies' primary strategy: How much can we get away with? There has been little, if any, regard for the customers they serve.--From <http://newnetworks.com/bookbrokenpromiss/> --(viewed on June 12, 2015).

In this book, esteemed television executive and Harvard lecturer Ken Basin offers a comprehensive overview of the business, financial, and legal structure of the U.S. television industry, as well as its dealmaking norms. Written for working or aspiring creative professionals who want to better understand the entertainment industry — as well as for executives, agents, managers, and lawyers looking for a reference guide — The Business of Television presents a readable, in-depth introduction to rights and talent negotiations, intellectual property, backend deals, licensing, streaming platforms, international production, and much more. The book also includes breakdowns after each chapter summarizing deal points and points of negotiation, a glossary, a list of referenced cases, and a wealth of real-world examples to help readers put the material into context.

Get HDTV and get connected without getting confused! Buy wisely, surround yourself with sound, watch your movies in HD, and more. If HDTV looks appealing but the mountain of mumbo-jumbo has you peeling out the door, take heart! Finally, here's a plain-English explanation of what HDTV is and how to choose one, hook it up, locate and access programming sources, and even how to connect your movie machines and Xbox for even more HD fun. Discover how to: Plan your HDTV system and choose the right equipment. Connect to programming sources. Add A/V entertainment gear and accessories. Access HDTV over your home network.

This work provides comprehensive and contemporary information on the essential concepts and terms in video and television, including coverage of test and measurement procedures.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Lawrence Lessig, " the most important thinker on intellectual property in the Internet era " , masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been able to exert such control over what we can and can ' t do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and, ultimately, our freedom to imagine.
