" Le rue courbe et le chemin des ânes, la rue droite le chemin des hommes ", présentait Le Corbusier à un moment où la ville ancienne était accusée de tous les maux. Ce jugement a eu et a encore ses défenseurs. Mais que signifie-t-il exactement ? Comme en contrepoint à ce jugement, " La rue a Rome " explore les racines culturelles de notre urbanité à travers les rues de la ville de Rome, matrice et modèle de la ville occidentale durant de nombreux siècles. La rue y apparaît alors comme un véritable révélateur de l'imaginaire urbain. Grâce à la confrontation des sources documentaires très variées (relevés de fouille, textes juridiques, œuvres littéraires, guides touristiques...) et d'une très riche iconographie (plus de 250 illustrations), l'auteur tente d'éclairer les évolutions culturelles majeures de la ville en rapport avec le contexte européen afin de mieux appréhender les problèmes et contradictions de la ville actuelle. Fruit d'un travail interdisciplinaire, ce livre s'adresse à tous ceux qui s'intéressent à la ville (aménageurs, historiens d'art, géographes, architectes...) mais aussi à l'histoire culturelle de l'Occident en général.

In deciding which models to choose for inclusion in this book selected from Fiat's huge inventory, the author concentrated on three criteria - greatness, size and emotion. Where size is an easy parameter to qualify, greatness is more complicated because it is a combination of of both the manufacturer's and the public's opinion. A car that is highly regarded by the public may not have been a

commercial success and vice versa. A truly great car is one that works well for both parties. Emotion may be considered to be an element of greatness in that the public's 'love' for a car is a fantastic benefit for a manufacturer and must be treasured. Fiat have made the mistake of 'improving' an icon on several occasions only to find that public opinion went against them. Fortunately Fiat has been magnanimous enough to respond by giving the car buying public more of what it wants. As long as they continue to do so then Fiat's reputation as the world's greatest small car manufacturer is set to continue. The author chose the Topolino as the starting point as the car fulfils all the criteria and it was the first Fiat built in the late 1930s to satisfy the Italian public's new-found desire for mobilisation. The old conventions of car production were turned upside down with the arrival of the 600 which revolutionised car production techniques and maximised on passenger space and performance at minimal cost. These principals continued via a succession of models which include the 500, 850, 126, 127 through to more recent models like the Cinquecento and Seicento. Running in parallel with these 'cheeky' Fiats, this book covers a range of slightly larger cars that were built in huge numbers. Though rather staid in appearance, the 1950s Millecento was family transport for millions of Italians covering three decades, four when the Indian-built cars are included. Similarly the 128, Panda and Uno were 'the' Italian small cars of the '70s, '80s and '90s. Nuova Panda carries the banner to the present day.

Il libro nasce dalla passione e dalla pratica, oramai trentennale, per la fitoterapia cercando di comprendere sempre più la potenza benefica che Madre Natura ci regala e mette a disposizione. Non dimenticando, certamente, i pro ed i contro, così da prendere gli effetti benefici delle piante medicinali e prestando grande attenzione sia a quelli che possono risultare deleteri che alle interazioni con i farmaci tradizionali e con gli alimenti. Da qui il desiderio di mettere su carta delle informazioni, dei cenni di riflessione per permettere, con attenzione e con l'uso della fitoterapia, il ripristino di un corretto stato di salute, personalizzando con l'arte della galenica la terapia utile e necessaria.
