 DJ-3A. The DJ-3A was introduced in 1955 for the 1956 model year. It was an inexpensive design because it efficiently used Jeep’s existing tooling and technology. It used the body style of the older CJ-3A, along with the L-134 engine. Unlike the CJ-3A, it came with either a column shift or floor shift three-speed Borg-Warner T-96 manual transmission.. It was offered with many different body ...

This 'Owners Edition' workshop manual covers the Citroen Relay and the Peugeot Boxer diesel powered with two 1.9 litre engines, a naturally aspirating diesel engine and a turbodiesel engine, known as the XUD engines. Two 2.5 Litre engines were also fitted to both makes, without or with turbocharger, known as DJ5 engines.

This is the second book edited with a selection of papers from the two-yearly THIESEL Conference on Thermo- and Fluid Dynamic Processes in Diesel Engines, organised by CMT-Mvtores Termicos of the Universidad Po/itecnica de Valencia, Spain. This volume includes versions of papers selected from those presented at the THIESEL 2002 Conference th held on 10th to 13 September 2002. We hope it will be the second volume of a long series reflecting the quality of the THIESEL Conference. This year, the papers are grouped in six main thematic areas: State of the Art and Prospective, Injection Systems and Spray Formation, Combustion and Emissions, Engine Modelling, Alternative Combustion Concepts and Experimental Techniques. The actual conference covered a wider scope of topics, including Air Management and Fuels for Diesel Engines and a couple of papers included reflect this variety. However, the selection of papers published here represents the most current preoccupations of Diesel engine designers, namely how to improve the combustion process using new injection strategies and alternative concepts such as the Homogeneous Charge Combustion Ignition.
