Get a solid understanding of Java fundamentals to master programming through a series of practical steps Key Features Enjoy your first step into the world of programming Understand what a language is and use its features to build applications Learn about a wide variety of programming applications Book Description Have you ever thought about making your computer do what you want it to do? Do you want to learn to program, but just don't know where to start? Instead of guiding you in the right direction, have other learning resources got you confused with over-explanations? Don't worry. Look no further. Introduction to Programming is here to help. Written by an industry expert who understands the challenges faced by those from a non-programming background, this book takes a gentle, hand-holding approach to introducing you to the world of programming. Beginning with an introduction to what programming is, you'll go on to learn about languages, their syntax, and development environments. With plenty of examples for you to code alongside reading, the book's practical approach will help you to grasp everything it has to offer. More importantly, you'll understand several aspects of application development. As a result, you'll have your very own application running by the end of the book. To help you comprehensively understand Java programming, there are exercises at the end of each chapter to keep things interesting and encourage you to add your own personal touch to the code and, ultimately, your application. What you will learn Understand what Java is Install Java and learn how to run it Write and execute a Java program Write and execute the test for your program Install components and configure your development environment Learn and use Java language fundamentals Learn object-oriented design principles Master the frequently used Java constructs Who this book is for Introduction to Programming is for anybody who wants to learn programming. All you'll need is a computer, internet connection, and a cup of coffee.

Financial Accounting and Reporting is the most up to date text on the market. Now fully updated in its fourteenth edition, it includes extensive coverage of International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS). This market-leading text offers students a clear, well-structured and comprehensive treatment of the subject. Supported by illustrations and exercises, the book provides a strong balance of theoretical and conceptual coverage. Students using this book will gain the knowledge and skills to help them apply current standards, and critically appraise the underlying concepts and financial reporting methods.

Essential Mathematics for Economics and Business is established as one of the leading introductory textbooks on mathematics for students of business and economics. Combining a user-friendly approach to mathematics with practical applications to the subjects, the text

Read Free Fac1501 Past Exam Solutions

provides students with a clear and comprehensible guide to mathematics. The fundamental mathematical concepts are explained in a simple and accessible style, using a wide selection of worked examples, progress exercises and real-world applications. New to this Edition Fully updated text with revised worked examples and updated material on Excel and Powerpoint New exercises in mathematics and its applications to give further clarity and practice opportunities Fully updated online material including animations and a new test bank The fourth edition is supported by a companion website at www.wiley.com/college/bradley, which contains: Animations of selected worked examples providing students with a new way of understanding the problems Access to the Maple T.A. test bank, which features over 500 algorithmic questions Further learning material, applications, exercises and solutions. Problems in context studies, which present the mathematics in a business or economics framework. Updated PowerPoint slides, Excel problems and solutions. "The text is aimed at providing an introductory-level exposition of mathematical methods for economics and business students. In terms of level, pace, complexity of examples and user-friendly style the text is excellent - it genuinely recognises and meets the needs of students with minimal maths background." -Colin Glass, Emeritus Professor, University of Ulster "One of the major strengths of this book is the range of exercises in both drill and applications. Also the 'worked examples' are excellent; they provide examples of the use of mathematics to realistic problems and are easy to follow." -Donal Hurley, formerly of University College Cork "The most comprehensive reader in this topic yet, this book is an essential aid to the avid economist who loathes mathematics!" -Amazon.co.uk

Conveyancing is designed for law students and new lawyers studying applied land law on the Irish Professional Practice Course. As the fourth edition is published at a time when major reform and modernisation of land law and conveyancing is proposed, the text has been fully revised and updated to include reference to proposed reforms, recently published bills and new legislation enacted. This includes new coverage on the Land Act 2005, the Title Act 2006 and the fundamental changes proposed by the Land and Conveyancing Law Reform Bill 2006. In two volumes, the fourth edition also features updated sample documentation and precedents to enable students to consider the procedural aspects of conveyancing. It includes complete coverage of all the essential knowledge needed when practicing conveyancing, including the legal concept of property, and the protection, acquisition and movement of proprietary interests. The principles of conveyancing practice are clearly explained, ensuring that this is an essential text for apprentices and practitioners in this field.

Die 54 gedigte in Toulopers is almal splinternuut en is geskryf met tieners van 13 tot 15 jaar in gedagte.

Do you ever wish you'd made better notes from a lecture? Do you find

it difficult to identify the ratio of a case? Do you feel confident about which sources to use in your research and what constitutes plagiarism? Skills for Law Students is an innovative new online resource which covers all of the skills that law students need to understand and develop during the course of their law degree. It includes clear, practical advice on how to develop your skills as well as over 170 interactive activities to test progress and to help put the theory into practice. Skills for Law Students is unique in its approach to the teaching of legal skills. It is an online resource with an accompanying textbook. This innovative approach encourages blended learning and supports flexible learning and self-directed study. Each of the 32 chapters deals with a separate skill. Each chapter contains two key elements: the text providing an overview of what that skill is; why it is important; and how to develop it and interactive activities which enable students to understand the topic better; to put the skills into practice; and to self-study and receive immediate feedback on their progress. www.oxfordinteract.com/lawskills

Key features

Interactive activities: The site contains over 170 interactive activities which are designed to help students understand the topics better; to put the skills into practice; and to self-study and receive immediate feedback on their progress. There is a wide variety of activity types, including multiple choice; complete a flowchart; identify keywords; and true/false.

Video recordings: There are over 50 video recordings throughout the site for you to watch. These will not only add more variety and interest to your learning; they will also enable you to see good and bad practice of some of the more practical skills (such as presentation skills and mooting). The video clips also show you current law students and legal practitioners reflecting on the skills they have developed and the skills which are key to their careers.

Reflective diary: At various points throughout the site you will be encouraged to reflect upon something you have just read or done. You can then click on the reflective diary link (which appears on every page) to log your thoughts. This could then feed into your personal development plan at university.

Hyperlinked glossary: We have provided definitions for any words or phrases we think you might not be familiar with. Simply hover over the word to see the definition before continuing with your reading.

Cross references: Whatever you undertake in your studies, you will realise that a combination of different skills are required for most tasks. Some skills are very closely related to others and we highlight links between topics throughout the resource with numerous hyperlinked cross-references. This will enable you to navigate your way around the site and to see how various topics interlink.

Your scores: Your scores are recorded on the 'my scores' page. This page will be updated every time you complete an activity and you can re-take the activities as many times as you like. Why not use this page to evaluate where your strengths and weaknesses lie and which areas you may want to focus on for development?

Activating an account: Access to the online site is via a unique access code which is printed in a sealed card inside every book.
