Four-handed dentistry is synonymous with the term close support dentistry. This concept is built around increasing efficiency during treatment, increasing patient care, reducing stress and fatigue of both the operator and the dental nurse, and maximising the skills of the dental team. The whole idea of dentistry is to offer patients treatment in a safe, non-threatening environment, providing them with a pleasant and efficient dental visit.

Four-handed dentistry means that both the dentist and assistant may have one, or both hands, near or within the mouth of a patient at the same moment. Instruments need to be passed swiftly to the dentist, and then back to the dental assistant during oral surgery, and four-handed dentistry accomplishes this more effectively.
