This volume offers a vivid personal account of eminent philosophers and educators with whom the author has interacted over the half century of his academic career at Harvard. It recalls the personalities and ideas of landmark thinkers of the recent past, thus counteracting the prevalent amnesia of research universities. It reflects on the educational impact of the scholars' styles of teaching as well as the varied approaches embodied in their academic practice. In addition, it affords insights into the human workings of universities and the varieties of scholarship in the continuing quest of shared understanding. The book includes fourteen photographs of scholars portrayed in the book. "The book offers a rare glimpse from the inside of the most significant intellectual milieu of the Western world, and the insights of one of Harvard philosophy's most distinguished members. As such it will be of great interest to readers both from within and outside the academy." Harvey Siegel, Department of Philosophy, University of Miami, Coral Gables, FL, USA "Professor Scheffler writes wonderfully about an impressive array of famous scholars. His portraits are vivid, detailed, exact, often quite amusing, and just right in terms of length and range." David Hansen, Teachers College, Columbia University, NY, USA "This is the work of a gifted writer, an important contribution to the fields of philosophy and philosophy of education on both sides of the Atlantic. [b&] The strongest aspects of the work are the weaving together of personalities and ideas in a quasi-historical narrative, together with a look back at what the life of the mind meant in one professional's work." Steve Tozer, UIC College of Education, Chicago, IL, USA

From 1600 to the present day, entries cover psychology, pedagogy, sociology, anthropology, education, theology and political science, before these disciplines came to be considered distinct from philosophy. Clear and accessible, each entry contains a short biography of the writer, an exposition and analysis of his or her doctrines and ideas, a bibliography of writings and suggestions for further reading. With in-depth overviews of Waldo Emerson, Margaret Fuller, Noah Porter, Frederick Rauch, Benjamin Franklin, Thomas Paine and Thomas Jefferson, this is an invaluable one-stop research volume to understanding leading figures in American thought and the development of American intellectual history.

From the author of Wittgenstein's Poker and Would You Kill the Fat Man?, the story of an extraordinary group of philosophers during a dark chapter in Europe's history On June 22, 1936, the philosopher Moritz Schlick was on his way to deliver a lecture at the University of Vienna when Johann Nelböck, a deranged former student of Schlick's, shot him dead on the university steps. Some Austrian newspapers defended the madman, while Nelböck himself argued in court that his onetime teacher had promoted a treacherous Jewish philosophy. David Edmonds traces the rise and fall of the Vienna Circle—an influential group of brilliant thinkers led by Schlick—and of a philosophical movement that sought to do away with metaphysics and pseudoscience in a city darkened by fascism,

anti-Semitism, and unreason. The Vienna Circle's members included Otto Neurath, Rudolf Carnap, and the eccentric logician Kurt Gödel. On its fringes were two other philosophical titans of the twentieth century, Ludwig Wittgenstein and Karl Popper. The Circle championed the philosophy of logical empiricism, which held that only two types of propositions have cognitive meaning, those that can be verified through experience and those that are analytically true. For a time, it was the most fashionable movement in philosophy. Yet by the outbreak of World War II, Schlick's group had disbanded and almost all its members had fled. Edmonds reveals why the Austro-fascists and the Nazis saw their philosophy as such a threat. The Murder of Professor Schlick paints an unforgettable portrait of the Vienna Circle and its members while weaving an enthralling narrative set against the backdrop of economic catastrophe and rising extremism in Hitler's Europe.

A study of the significance of the visual arts in Merleau-Ponty's aesthetics in relation to the work of five artists not known or discussed by him. Merleau-Ponty's phenomenological ontology engages deeply with visual art, and this aspect of his work remains significant not only to philosophers, but also to artists, art theorists, and critics. Until recently, scholarly attention has been focused on the artists he himself was inspired by and wrote about, chiefly Cézanne, Klee, Matisse, and Rodin. Merleau-Ponty at the Gallery expands and shifts the focus to address a range of artists (Giorgio Morandi, Kiki Smith, Cy Twombly, Joan Mitchell, and Ellsworth

Kelly) whose work came to prominence in the second half of the twentieth century and thus primarily after the philosopher's death. Véronique M. Fóti does not confine her analyses to Merleau-Ponty's texts (which now importantly include his late lecture courses), but also engages directly with the art. Of particular concern to her is the art's ethical bearing, especially as related to animal and vegetal life. The book's concluding chapter addresses the still-widespread rejection of beauty as an aesthetic value. "The book operates along several lines at once, offering insightful and new critical readings of artists through the lens of Merleau-Ponty's scholarship. Clearly written and engaging, it will be of interest to a wide range of scholars and students." Rajiv Kaushik, Brock University
