Hardbound. The tone of the Proceedings is set by the three Plenary papers, and the remaining papers are arranged under the coherent themes of environment, computational methods, modelling and simulation, design methods and applications. The papers in the Proceedings represent the state-of-the-art in the rapidly changing technology of computer aided design in control systems. They clearly show how that technology is absorbing the most recent developments in computer science and adapting them to its requirements. The reader will find that the emphasis in the technology is shifting towards open environments with object-oriented databases and modern graphical user interfaces supporting a whole range of tools for modelling, analysis and design.
