This second edition provides a comprehensive and scientific approach to evaluating ship resistance and propulsion. Written by experts in the field, it includes the latest developments in CFD, experimental techniques and guidance for the practical estimation of ship propulsive power. It addresses improvements in energy efficiency and reduced emissions, and the introduction of the Energy Efficiency Design Index (EEDI). Descriptions have now been included of pump jets, rim driven propulsors, shape adaptive foils, propeller noise and dynamic positioning. Trial procedures have been updated, and preliminary estimates of power for hydrofoil craft, submarines and AUVs are incorporated. Standard series data for hull resistance and propeller performance are included, enabling practitioners to make ship power predictions based on material and data within the book. Numerous fully worked examples illustrate applications for most ship and small craft types, making this book ideal for practising engineers, naval architects, marine engineers and undergraduate and postgraduate students.

John "Lofty" Wiseman is the author of the bestselling SAS Survival Handbook, the definitive guide to survival in the wild from Britain's Special Air Service. Now he has compiled the complete guide to surviving among crowds of people, the mazes of office buildings, the dangers of an unfeeling city-put simply, how to stay safe in the urban jungle. Thousands of preventable fatalities occur in the home every year- more than on the roads, more than in the great outdoors. Household chemicals, electricity, cooking knives, and rodent poisons-in the wrong hands and with improper usage, these day-to-day resources bring danger to your home. Add to this the risks of moving through city streets (the threat of rape, muggings, and gang violence) and the menace of natural disasters (floods, earthquakes, blizzards) that cannot be avoided. Every day serves as a constant reminder: The world is truly a frightening place. The SAS Urban Survival Guide advises readers to think practically about urban environments and offers tips and instructions on how to avoid hazards wherever one goes. From self-defense techniques to home security systems to coping with natural disasters, this book teaches readers to recognize danger, make quick decisions, and live confidently in the modern world.

This text is intended primarily for readers interested in mathematical probability as applied to mathematics, statistics, operations research, engineering, and computer science. It is also appropriate for mathematically oriented readers in the physical and social sciences. Prerequisite material consists of basic set theory and a firm foundation in elementary calculus, including infinite series, partial differentiation, and multiple integration. Some exposure to rudimentary linear algebra (e.g., matrices and determinants) is also desirable. This text includes pedagogical techniques not often found in books at this level, in order to make the learning process smooth, efficient, and enjoyable. Fundamentals of Probability: Probability Basics. Mathematical Probability. Combinatorial Probability. Conditional Probability and Independence. Discrete Random Variables: Discrete Random Variables and Their Distributions. Jointly Discrete Random Variables. Expected Value of Discrete Random Variables. Continuous Random Variables: Continuous Random Variables and Their Distributions. Jointly Continuous Random Variables. Expected Value of Continuous Random Variables. Limit Theorems and Advanced Topics: Generating Functions and Limit Theorems. Additional Topics. For all readers interested in probability.

Covers 5.5hp through 20hp four-stroke engines.

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

-Take a breath, imagine dragons, legends shadowed in the mist. Close your eyes in willing wonder - you can make them all exist.- With full color illustrations and exciting and humorous poems, kids and parents alike will enjoy this look into a world where dragons exist. Kai Satoshi's whimsical and thoughtful poetry along with his beautiful images creates a world of wonder and a place we would all love to live.

For Australia, the First World War remains the costliest conflict in terms of deaths and casualties. From a population of fewer than five million, 416,809 men enlisted, of whom more than 60,000 were killed, 156,000 wounded or gassed, and 4044 taken prisoner of war, of which 397 died in captivity. Women provided the essential medical and other assistance throughout the conflicts including the Middle East, Western Front and on the Hospital Ships. Queensland, at the commencement of the Great War, had a population of fewer than 600,000, with nearly 55,000 enlisting. War left a devastating effect on mothers, fathers, wives and other family members, as well as communities in which they lived; this effect was felt for many years after the cessation of hostilities. This book combines the historic story with images and documents of the Great War, with a timeline of the individual enlistee throughout his service to King and Country. Images and documents, of which some are over 100 years old, have been skilfully copied to improve clarity by the publisher. This book is dedicated to all the enlistees from the Diamantina Shire that volunteered for service during the past wars and hostilities.

Dr Power's Casebook is a collection of 14 new Dr Power short stories by scientist Hugh Greene. @hughgreenauthor Each has a particular diagnosis in mind and describes elements of the psychiatrist detective's life. The book is intended for aficionados of the acclaimed Dr Power / Superintendent Lynch novels and answers questions about Dr Power and the other characters and includes important clues to the rest of the series. The stories are woven around events in the three novels The Darkening Sky, The Fire of Love and The Good Shepherd. The cover and interior are illustrated by Paul Imrie.
