Sharks are not evil. But they're single-minded and very, very hungry. On land, they take the form of bosses, businesspeople, colleagues, family, and sociopathic neighbors. In the world of former governor of New Mexico and US ambassador to the United Nations Bill Richardson, they have taken the form of the most powerful people in the world. He's engaged in high-stakes, face-to-face negotiations with Castro, Saddam, the Taliban, two generations of North Korean leadership, and many more of the world's most infamous dictators—and done it so well he was known as the "Undersecretary of Thugs" while with the Clinton administration. Now the 5-time Nobel Peace Prize nominee tells these stories—from Washington, DC, to the Middle East to Pyongyang—in all their intense and sometimes absurd glory. *How to Sweet-Talk a Shark* is a rare, candid, and entertaining glimpse into an insider's world of high-stakes negotiation—showing Richardson's successes and failures in some of the world's least friendly places. Meanwhile, readers get frank lessons in the art of negotiation: how to prepare, how to size up your opponent, how to understand the nature of power in a standoff, how to give up only what is necessary while getting what you want, and many other strategies Richardson has mastered through at-the-table experience—and from working with other master negotiators like Presidents Obama and Clinton, and Nelson Mandela. These are takeaways that anyone can use to negotiate with the power brokers, dealmakers, and, yes, the hungry

Developed nations strive to create the impression that their hearts and pockets bleed for the developing world. Yet, the global North continues to offer unfavorable trade terms to the global South. Truly fair trade would make reciprocal concessions to developing countries while allowing them to better their own positions. However, five hundred years of colonial racism and post-colonial paternalism have undermined trade negotiations. While urging developing countries to participate in trade, the North offers empty deals to "partners" that it regards as unequal. Using a mixed-methods approach, J. P. Singh exposes the actual position beneath the North's image of benevolence and empathy: either join in the type of trade that developed countries offer, or be cast aside as obstreperous and unwilling. Singh reveals how the global North ultimately bars developing nations from flourishing. His findings chart a path forward, showing that developing nations can garner favorable concessions by drawing on unique strengths and through
