Sixteen year old Jules Blaze, heir of a Keeper, suspects his family hides a forgotten secret. It's bad enough that his people, the Elfies of Reign, triggered a curse which reduced the entire inhabitants to a mere inch centuries ago. All because of one Keeper who failed his purpose. Even the King's Books, penned with the Majesty's own blood, did not help ward off this anathema. Now, Gehzurolle, the evil lord, and his armies of Scorpents, seem bent on destroying Jules and his family. Why? Gehzurolle's agents hunt for Jules as he journeys into enemy land to find the truth. Truth that could save him and his family, and possibly even reverse the age-long curse. Provided Jules doesn't get himself killed first.

Since taking over an embattled basketball program at the University of Cincinnati in 1989, Bob Huggins has inspired almost as many debates as victories. He has returned the team to its heritage as a national power, taken the school to the Final Four and Elite Eight, and earned so much respect that he was almost swept away by an offer from the NBA's Miami Heat. Yet, for all his accomplishments, he cannot escape the controversy and questions about his style.

Developers who want to access USB devices from their embedded systems will find a helpful resource in USB Embedded Hosts: The Developer's Guide. This new book from the author of USB Complete shows how small systems can take advantage of the same wealth of USB devices available to conventional PCs. The book begins with a review of USB host communication protocols. Readers then learn which USB host requirements are relaxed for embedded systems and what new requirements some embedded systems must meet. To help in selecting a development platform, the book explores available hardware and software for USB host communications in small systems. The heart of the book focuses on communicating with USB devices. The topics (with example code) include USB drives, keyboards, virtual serial ports, network bridges, mics, speakers, video cameras, and printers, plus devices that don't fit defined USB classes. Also discussed are systems that support both USB host and device functions. The example code is written for the BeagleBoard-xM open development board using a distribution of Linux targeted to small systems. Also covered is how to use Linux commands and utilities to learn about, monitor, and debug communications with USB devices.
