George Eastman transformed the world of photography. In this revealing and informative biography, Elizabeth Brayer draws a vivid portrait of this enigmatic and complex man.

Bergeron and Lacinski's new book Serious Straw Bale is the first to look carefully at the specific design considerations critical to success with a straw bale building in more extreme climates-where seasonal changes in temperature, precipitation, and humidity create special stresses that builders must understand and address. The authors draw upon years of experience with natural materials and experimental techniques, and present a compelling rationale for building with straw-one of nature's most resilient, available, and affordable byproducts.

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

"A totally absorbing book...imaginative and erudite, full of startling juxtapositions and flashes of real perception."—Jonathan D. Spence John E. Will's masterful history ushers us into the worlds of 1688, from the suicidal exaltation of Russian Old Believers to the ravishing voice of the haiku poet Basho. Witness the splendor of the Chinese imperial court as the Kangxi emperor publicly mourns the death of his grandmother and shrewdly consolidates his power. Join the great caravans of Muslims on their annual pilgrimage from Damascus and Cairo to Mecca. Walk the pungent streets of Amsterdam and enter the Rasp House, where vagrants, beggars, and petty criminals labored to produce powdered brazilwood for the dyeworks. Through these stories and many others, Wills paints a detailed picture of how the global connections of power, money, and belief were beginning to lend the world its modern form. "A vivid picture of life in 1688...filled with terrifying violence, frightening diseases...comfortingly familiar human kindnesses...and the intellectual achievements of Leibniz, Locke, and Newton."—Publishers Weekly

In The World from 1450 to 1700, historian John Wills takes a fresh look at one of the most fascinating and tumultuous periods in world history. Assuming a global perspective, rather than the traditional Eurocentric view, Wills traces the interwoven changes that led from the world of Columbus, Luther, and the Mughal emperor Babur to the world of Locke, Louis XIV, and the Kangxi emperor. The book's multi-centered approach explores historical events not in isolation but rather in a dynamic nexus of connections ranging from the Italian Renaissance and the Protestant Reformation to the Sikh, Hindu, and Confucian revivals; from the transformation of Japan in 1600 to the forced migrations of millions of African slaves; from the English Civil War and expanding Qing and Muscovite empires in Asia to new forms of scientific knowledge and parliamentary democracy in Europe. It is an interlocking world of change and movement, innovation and conquest, and Wills marshals his extraordinary narrative skill and breadth of learning to bring this period vibrantly to life.
