James Brown. John Brown's raid. Brown v. the Topeka Board of Ed. The prizewinning author of Blue Laws meditates on all things "brown" in this powerful new collection--now in paperback. Divided into "Home Recordings" and "Field Recordings," Brown speaks to the way personal experience is shaped by culture, while culture is forever affected by the personal, recalling a black Kansas boyhood to comment on our times. From "History"--a song of Kansas high-school fixture Mr. W., who gave his students "the Sixties / minus Malcolm X, or Watts, / barely a march on Washington"--to "Money Road," a sobering pilgrimage to the site of Emmett Till's lynching, the poems engage place and the past and their intertwined power. These thirty-two taut poems and poetic sequences, including an oratorio based on Mississippi "barkeep, activist, waiter" Booker Wright that was performed at Carnegie Hall and the vibrant sonnet cycle "De La Soul Is Dead," about the days when hip-hop was growing up ("we were black then, not yet / African American"), remind us that blackness and brownness tell an ongoing story. A testament to Young's own--and our collective--experience, Brown offers beautiful, sustained harmonies from a poet whose wisdom deepens with time.

From fixing a flat tire to changing the oil, a guide to home car care provides easy-to-follow instructions for monitoring brakes, checking fluids, adjusting headlights, troubleshooting major problems, and other tasks.

Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.

This work explores the relationships between legal institutions and political and economic transformation. It argues that as law is enlisted to help produce the profound economic and sociotechnical shifts that have accompanied the emergence of the informational economy, it is changing in fundamental ways.
