Built as a "crawler" and equipped with a 6-cylinder, water-cooled engine, the M4 could travel cross-country through swamps and sand, or on the highway at speeds up to 33 mph. Over 5,500 M4s were built between 1942 and 1945, with many remaining in service into the 1960s. Created in 1943, this official TM 9-785 Technical Manual reveals a great deal about the M4's design and capabilities. Intended as a manual for those charged with
