Discover why and how schools must become places where thinking is valued, visible, and actively promoted As educators, parents, and citizens, we must settle for nothing less than environments that bring out the best in people, take learning to the next level, allow for great discoveries, and propel both the individual and the group forward into a lifetime of learning. This is something all teachers want and all students deserve. In Creating Cultures of Thinking: The 8 Forces We Must Master to Truly Transform Our Schools, Ron Ritchhart, author of Making Thinking Visible, explains how creating a culture of thinking is more important to learning than any particular curriculum and he outlines how any school or teacher can accomplish this by leveraging 8 cultural forces: expectations, language, time, modeling, opportunities, routines, interactions, and environment. With the techniques and rich classroom vignettes throughout this book, Ritchhart shows that creating a culture of thinking is not about just adhering to a particular set of practices or a general expectation that people should be involved in thinking. A culture of thinking produces the feelings, energy, and even joy that can propel learning forward and motivate us to do what at times can be hard and challenging mental work.

I am delighted that they have gathered their wisdom here in this volume to share with others eager to embark on the journey and experience the joys of facilitating learning with colleagues." —From the Foreword by Ron Ritchhart, senior research associate, Project Zero, Harvard Graduate School of Education One of the most important shifts in schools in the last two decades has been the growing emphasis on collaboration among teachers and other educators. Whether you are a teacher facilitating a group for the first time or an experienced facilitator seeking to further develop your skills, this book is for you. Organized to be used as both an exploration of the role of facilitating and as a handbook of strategies, this resource covers a range of contexts that include faculty meetings, department meetings, professional learning communities, grade-level teams, and inquiry groups. This book is a perfect companion to the authors' bestseller, The Facilitator's Book of Questions, which focuses on the skills needed to facilitate protocols or structured conversations. It is an essential resource for teachers, administrators, coaches, and teacher educators. Book Features: Contrasts facilitating for learning with other professional development roles, including staff development, coaching, and supervision.Outlines the basic responsibilities and tasks of facilitating teacher learning groups, including "moves" the facilitator might employ.Considers challenges related to school culture and leadership, group interactions, and time constraints.Provides resources to help facilitators develop their skills, including tools and references to other works on facilitation.
