"The authors classify all managers into one of four types: Teacher; Cheerleader; Always-on; and Connector managers. Drawing on data-driven research, as well on case studies and interviews, the authors show that Connector managers consistently outperform the other types, then explain what behaviors define a Connector manager and why they are able to build strong teams. They also show why other types of managers are not equally effective, and how they can incorporate behaviors of Connector managers in order to be more effective at building teams"--

This book is concerned with how people come together to achieve a productive purpose. Human survival has always depended upon our ability to form and sustain social organisations. People have a deep need to be creative and to belong. By creating positive organisations we can fulfil these needs and build a worthwhile society. Such organisations do not occur by chance; a positive organisation is created by the hard work of leaders and members and influenced by the way the organisation is designed, especially its systems. All this needs to be based on an understanding of sound, general principles of behaviour. This book outlines that work; how to build a positive organisation in terms of general principles and practical examples. Understanding and applying this work requires discipline (not dogma) and creativity. The authors show the significant positive results that can be achieved and detail a range of case studies. Unlike some books which are based on goals, objectives or

visions this book concentrates on how this can be achieved. The authors observed and engaged with what good leaders and members actually do and have endeavoured to distil the essence of productive relationships based on core, human values. This work has been applied in businesses, social service agencies, hospitals, city governments, national governments, armies, churches, public utilities, indigenous communities, schools and other unique organisations. It is intended to help leaders create more humane and productive organisations that can both meet their objectives and improve the human condition. It does so by presenting a coherent theory exemplified by numerous cases and practical experience. As more than one leader has commented, 'this stuff actually works'. The CD supplied with the book contains 11 case studies which look at the application of systems leadership techniques in a range of organisational contexts.

Achieving Excellence in Dealer/Distributor Performance offers in-depth management coaching in each of these areas -- machinery sales, rentals, service, parts and customer training and retention, and is filled with practical programs to strengthen and increase profitability, cash flow and customer retention. Dealer Development founder and author Walter McDonald has based this text on 40 years' experience in dealer management consulting and over 2,650 dealer management workshops. In many ways, this book is a written reflection of Walt's live dealer management seminars. If you are familiar with his work, you know that he focuses on the real value generating activities of the business. He is in the trenches with the dealer managers and field sales and aftermarket reps who create real value and make it happen every hour of every day in the dealership. McDonald's dealer management guide is an absorbing refresher for informed senior executives and a highly useful handbook for those future dealer leaders and related OEM managers on the way up. This dealer guide actually contains two books, one book with benchmarks and advice on what the numbers mean and the second book on how to improve the numbers. This manuscript could have been subtitled: 'real metrics, real solutions.' The dealer/distributor can analyze its business operations through the performance yardsticks presented in this timely publication. By Nick W. McGaughey, CPA, "This dealer text is very well thought out, well written, easy to read and follow. I believe it will be very beneficial to dealer principals and operating managers. By Dr. Shankar Basu, CEO Toyota-Lift of Los Angeles I particularly like the section 'How This Book Can Help' included early on in the work to help the user focus in on their primary trouble spot. I also appreciate the inclusion of the page on 'Terminology.' I think it does a good job of setting up the frame of reference for the user. By Jim Johnson Former Dealer Development Manager Navistar I think dealer principals, operations and general managers, and sales, parts, service and rentals could all use this book. I can see value in taking this as a group reading project in our dealership and having weekly discussions on certain chapters. By George M. Keen Operations
