This made his return to playing on October 30 against Buffalo all the more electrifying. The stadium was louder that night than the nights we had raised our Super Bowl banners. Our captain, our leader, our inspiration was back on the field doing what he loved to do. Tedy had spent months rehabbing, had countless doctor visits, and had undergone hundreds of tests trying to play again. Just eight months after our victory in Super Bowl XXXIX, here we were celebrating a much bigger victory on our home field. Sure it was great to win the game, but that night we were celebrating Tedy's return as he showed us teammates,

Watercare engineer Ian Winson was seriously injured in a gas explosion in Onehunga, Auckland, in 2011, an incident that was a significant news event at the time. explosion Ian's life had revolved around work, sport and family. In one day he went from being an Ironman competitor and organiser of an iconic Auckland running event in the Waitakere Ranges, to an amputee requiring much medical intervention and months of rehabilitation just to reach a stage of basic mobility. His story is one of bravery, incredible determination, redefining oneself, a family's love, and an unerring hope. Also available as an e-book.

week. And then, on April 21, 2005, all that came to an end. He had a massive ischemic stroke. Doctors feared he wouldn't make it, or if he did make it, he would be in a vegetative state in a hospital bed for the rest of his life. But miraculously, that's not what happened . . . In *Relentless*, Ted W. Baxter describes his remarkable recovery. Not only did he live, but he's walking and talking again. He moves through life almost as easily as he did before the stroke; only now, his life is better. He's learned that having a successful career is maybe not the most important thing. He's learned to appreciate life more. He's learned that he wants to help people—and that's what he does. He gives back, volunteering his time and effort to help other stroke victims. *Relentless* is a wonderful resource for stroke

I do not claim to be an expert, but living with stroke since 1990 has taught me many things about life. I hope that as you read this book you will share some of my findings and perhaps gain the understanding that there is life following a stroke. People have inspired me in ways that made me realize that no one has to face any crucial medical emergency alone. Many stories of their adventures have shown me how to guide my own life through the ups and downs of a daily routine. It is my desire that one can understand my situations in a way so as to help them deal with the problems they may face or are facing. I remind

you that these are only my opinions or circumstances; each individual situation varies, but in the resolution of any problem, the methods from many sources may help. I only hope some comfort and knowledge may be gained from my walk through life.

Women will have different symptoms than men in so many things, however; my symptom was very strange indeed. My stroke caused me to have temporary disability; that is what I say to myself, although I do not have complete use of my right arm and leg, I consider it to be only temporary. I can walk with the use of a cane now, and I can use my right hand for some tasks. I have faith and have always projected complete recovery. I always speak healing over my body, although I dont see the immediate healing like you see

on T.V. I have never doubted about my healing. In my dreams I am always going about doing my chores and running errands in a complete state, I have never seen myself as been disabled. Thank God strokes can be treated and prevented, as long as you keep your blood pressure, cholesterol, and your blood sugar under control. Always visit your doctor to get them regulated. I was completely paralyzed on the right side of my body; I had no control of the muscles on the right side of my face, arm and leg. A heartening personal account of how one can maintain ones faith despite grave life challenges. Well-organized, charming work.
