From St. Augustine and early Ethiopian philosophers to the anti-colonialist movements of Pan-Africanism and Negritude, this encyclopedia offers a comprehensive view of African thought, covering the intellectual tradition both on the continent in its entirety and throughout the African Diaspora in the Americas and in Europe. The Encyclopedia is a large-scale work of 350 entries covering major topics involved in the development of African Thought including historical figures and important social movements, producing a collection that is an essential resource for teaching, an invaluable companion to independent research, and a solid guide for further study.

into a critical theoretical discipline responding to the challenges of the postmodern world-order? Dr. Humphrey M. Wawe contributes here a sound theological reflection using the hitherto unused methodological paradigm of mapping the inroads in the 'transaction' between the Bible and African culture.

This book is critically important for Bible translation theorists, postcolonial scholars, church leaders, and the general public interested in the history, politics, and nature of Bible translation work in Africa. It is also useful to students of gender studies, political science, biblical studies, and history-

This work critiques and contests colonial Bible translation narratives by privileging the importance African oral vitality in rewriting the meaning of biblical texts in the African sociopolitical, political, and cultural contexts.
