New Nrp Guidelines - bionet.biotechwithoutborders.org

- The 2017 NRP guidelines recommend a 30- to 60-second delay in clamping in all term and preterm infants not requiring resuscitation. - If the placental circulation is disrupted (e.g., placental abruption), the cord should be clamped immediately. Investigators found that delayed clamping reduced mortality before discharge.

Recent Recommendations in Neonatal Resuscitation 2019 UPDATE

While adult resuscitation guidelines have moved to CAB, neonatal resuscitation still follows the ABCs because most neonates who need resuscitation require airway and breathing support, and less often circulatory support. The reverse is true in adults. Assessing the Need for Neonatal Resuscitation

CD includes: full text plus dramatic footage of actual resuscitation events, laryngoscopic view of the airway, digitized animation, review questions, and learner-directed interactive video scenarios.

Textbook of Neonatal Resuscitation (NRP) 7th Edition 2016
The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to hospital staff who care for newborns at the time of delivery.
New in the 7th edition!
Text updated to reflect the 2015 AAP/AHA Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care of the Neonate
Two new chapters added covering post-resuscitation care and preparing for resuscitation
140] new full-color photographs replacing most line drawings

The gold-standard guide from the AAP and ACOG -- newly updated and more valuable than ever! Significantly revised and updated, the new 8th edition of this bestselling manual provides the latest recommendations on quality care of pregnant women, their fetuses, and their newborn infants. Jointly developed by the American Academy of Pediatrics (AAP) and American College of Obstetricians and Gynecologists (ACOG), this unique resource addresses the full spectrum of perinatal medicine from both the obstetric and pediatric standpoints. New in the 8th edition: New section on suggested levels of maternal care from birth centers to Level IV institutions
New sections on screening for preterm delivery risk added to chapter on antepartum care
New topics covered include the timing of cord clamping, the need (or not) for bedrest, and updates in hypertension
Guidance regarding postpartum contraception recommendations has been expanded
New section on mosquito-borne illnesses (including Zika)
New section on infections with high-risk infection control issues
Updated recommendations on neonatal resuscitation, screening and management of hyperbilirubinemia, and neonatal drug withdrawal.

The STABLE Program is a neonatal education program that focuses on the post-resuscitation/pre-transport stabilization care of sick newborns. This learner manual serves as a student handbook for either self-study or instructor-led presentations. It includes more than 220 pages, illustrated in full color.
