strategies for decisions to sell or buy a company is the widest known purpose among literature. The alternatives can be categorized into three parts: mergers and acquisitions, succession and continuation. The former reflects the selling or buying decision of companies, and the acquisition of shares and mergers. Succession means management buyouts, whereas continuation refers to reorganization, monitoring of financial standing and liquidity flotation, investments but also divestments and spin offs (cf. Hansa & Dvorak 2007). Adidas has gone through several valuations already. In 1994 Adidas was sold for 1,350 million German Mark whereas in mid-1995 the company was already valued at 3,300 million German Mark when it was initially offered to public (cf. Die Welt 1995). As of December 31st 2010 the price for an Adidas share was 48.89 Euro (€), reflecting a 29.4% growth compared to 2009 (cf. Adidas 2011 a, p. 2). The following paper on hand values the German company Adidas as of December 2010 with help of the valuation methods Discounted Cash Flow in terms of equity and entity approach as well as the market oriented multiples. Both valuation methods are theoretical defined and later applied to Adidas.

Celebrities attract the attention of commercial interests and other public figures. They receive payments from sponsors to endorse brands. They are sought out to appear with politicians during election campaigns. They are used to promote health messages. In other words, celebrities are often perceived to possess qualities that give them special value or what we will refer to here as 'celebrity capital'. This means that celebrities are regarded as being able to add premium value to specific objects, events, and issues and hence render these items more valuable or effective. Employing an interesting and new approach to the growing scholarly interest in celebrity culture, Barrie Gunter uses the idea of value as expressed through the term 'capital'. Capital usually refers to the monetary worth of something. Celebrity capital however can be measured in economic terms but also in social, political and psychological terms. Research from around the world has been collated to provide an evidence-based analysis of the value of celebrity in the 21st century and how it can be systematically assessed. Including further reading for students, key points and end of chapter discussion questions, Gunter creates the first methodology to assess the value of fame.
