Oracle Order Management Technical Reference Manual R12

Oracle Order Management provides seeded workflow process definitions for both orders and lines and enables you to define both order header and order line transaction types. The new Order Line differs functionally and technically from its R11 Order Entry counterpart. It contains attributes from old SO_HEADERS, SO_ORDER_LINES, and SO_LINE_DETAILS tables, in addition to some new attributes. Order Management offers Line level independence; each line has its own flow.
