XML DB is an out-of-the-box solution for storing and retrieving XML documents within Oracle. In addition, the registration of XML schemas allows XML

# Online Library Oracle Xml Db

DB to shred the XML documents and store them as object-relational structures to improve query performance within the database. No additional software is needed for this process as all the functionality is built into the Oracle9i Release 2 kernel.

reduces memory  
overhead associated  
with DOM

programming by  
managing XML  
schema-based XML

Oracle XML DB also supports the SQL/XML standard,
