Putting our differences to work means creating an environment where people, naturally unique and different—diverse by nature and experience—can work more effectively in ways that drive new levels of creativity, innovation, problem solving, leadership, and performance in the marketplaces, workplaces, and communities of the world. Debbie Kennedy shows how to make all the dimensions of difference—such as thinking styles, perspectives, experiences, work habits, and management styles, as well as more traditional diversity considerations like gender, race, ethnicity, physical abilities, sexual orientation, and age—tremendous sources of strength. Kennedy draws on the latest research and a wealth of real-world examples to offer compelling evidence showing exactly how putting our differences to work accelerates innovation and contribution. She identifies five distinctive qualities of leadership that leaders must add to their portfolio of skills to make differences an engine of success. And she provides a detailed six-stage process for making the most of differences in the workforce, combining first-person best-practice stories and strategic with tactical ideas to help you put each step into action. Kennedy has written both a personal and a practical guide that changes the prevailing rules of how to think, behave, and operate as a leader, connecting four diverse elements of business and society that have traditionally been siloed: innovation, leadership, diversity, and inclusion. She and futurist Joel Barker also look at how new discoveries, including Web 2.0 technologies, can draw us closer together in previously unimagined ways.

Beloved by academic and general readers alike, *Mountains Without Handrails*, Joseph L. Sax's thought-provoking treatise on America's national parks, remains as relevant today as when first published in 1980. Focusing on the long-standing and bitter battles over recreational use of our parklands, Sax proposes a novel scheme for the protection and management of America's national parks. Drawing upon still controversial disputes—Yosemite National Park, the Colorado River in the Grand Canyon, and the Disney plan for California's Mineral King Valley—Sax boldly unites the rich and diverse tradition of nature writing into a coherent thesis that speaks directly to the dilemma of the parks. In a new foreword, environmental law scholar Holly Doremus articulates this book's enduring importance and reflects on what Sax, her former teacher, might have thought about the encroachment of technology into natural spaces, the impact of social media, and growing threats from climate change. At this moment of great uncertainty for the national parks, *Mountains Without Handrails* should be read (and re-read) by anyone with a stake in America's natural spaces.

This outstanding collection of essays, presented at the 2005 Wheaton Theology Conference, explores the current issue of women in ministry from biblical, theological and ecclesiological perspectives. Bringing to bear the ministerial and sociological insights on the issue, this impressive integrative work aims to break through the current impasse between complementarians and egalitarians. These essays point the way forward for women and men in ministry in our churches. Contributors include Henri Blocher, Timothy George, James Hamilton, I. Howard Marshall, Cheryl J. Sanders, Sarah Sumner and Mary Stewart Van Leeuwen
