Transmits result of study proposing a solution for adequate illumination without glaring effect.

Doctoral Thesis / Dissertation from the year 2004 in the subject Computer Science - Commercial Information Technology, grade: A, Vienna University of Technology, 120 entries in the bibliography, language: English, abstract: This thesis examines the relationship of Knowledge Management (KM) and Information Technology (IT) using a holistic view. The first chapter presents definitions of knowledge and KM, discusses related fields to KM and knowledge types, argues what KM activities can be supported by IT, examines areas of IT related to KM, defines the focus of this thesis, and presents interesting artifacts. As areas that require flexibility, creativity, and learning are especially in need of KM, this thesis concentrates on them. The next chapter analyzes the goals of KM, problems to be addressed by KM-systems, goals and problems of a university, problems of (existing) KM-systems, and the requirements of a KM-system that supports a KM initiative that addresses the mentioned problems and does not suffer from the described problems. Following the identification of requirements for KM-systems, chapter 3 discusses important preconditions and foundations for KM and KM-systems. As a " complete" KM-system can only be part of a " complete" and holistic KM initiative, this examination presents indispensable issues for such KM initiatives and discusses the importance and relevance of them. The next chapter presents three existing solutions (CYMANTIX.NET / Oracle / Lotus/IBM). Finally, the chapter examines to what extent the three solutions address the requirements identified and what is missing. The main chapter of this thesis describes the proposed IT solution in the context of a holistic KM initiative. It starts with a discussion of principles such as participatory design, etc. that have to be adhered to when designing, implementing, and introducing the proposed KM-system. Then, the proposed KM-system is presented consisting of three major building blocks, namely the central user interface, the virtual information pool, and automation as well as further aspects. Furthermore, the relationship of eLearning and KM with regard to the proposed KM-system is examined, implementation issues are discussed, and the chapter ends with an evaluation of the proposed solution. The concluding chapter summarizes this thesis and stresses the holistic point of view that is combined with proposing a " complete" IT system supporting KM. It discusses the pros and cons of this approach evaluation results. Finally, it presents areas that need further research and what the future holds for KM.

A concise version of the most successful college rhetoric published in more than a decade, The Allyn & Bacon Guide to Writing: Concise Edition offers the most progressive and teachable introduction to academic and personal writing available. This four-color guide offers engaging instruction in rhetoric and composition, a flexible sequence of comprehensive writing assignments, and numerous examples of student and professional writing. Solidly grounded in current theory and research, yet eminently practical and teachable, The Allyn & Bacon Guide to Writing: Concise Edition is the new standard for first-year composition courses in writing, reading, critical thinking, and inquiry. Part I, "A Rhetoric for College Writers," provides a conceptual framework for the text by showing how inquiring writers pose problems, pursue them through discussion and exploratory writing, and solve them within a rhetorical context shaped by the writer's purpose, audience, and genre. Part II, "Writing Projects," contains six self-contained assignment chapters arranged according to the purposes for writing. Each chapter guides students through the process of generating and exploring ideas, composing and drafting, and revising and editing. "Guidelines for Peer Reviewers" which sum up the important features in the assignments and facilitate detailed, helpful peer reviews. Part III, "A Guide to Composing and Revising," comprises two self-contained chapters of nuts-and-bolts strategies for composing and revising. Part IV, "A Rhetorical Guide to Research," presents pedagogically sequenced instruction for helping students learn to conduct searches, evaluate sources, and incorporate sources into their own writing. Research skills are taught within a rhetorical context with special attention to the rhetoric of websites.

Elayn Martin-Gay's success as a developmental math author starts with a strong focus on mastering the basics through well-written explanations, innovative pedagogy and a meaningful, integrated program of learning resources. The revisions to this edition provide new pedagogy and resources to build reader confidence and help readers develop basic skills and understand concepts. Features incorporation of AMATYC and NCTM standards-reflected in an increased emphasis on visualization graphing, and data analysis. In addition, Martin-Gay's 4-step problem solving process-Understand, Translate, Solve and Interpret-is integrated throughout. Also includes new features such as Study Skills Reminders, "Integrated Reviews", and "Concept Checks." For those in need of a graphing utility resource in intermediate algebra, and for readers who need to prepare for advanced algebra or finite math.
