The goal of this product is to empower students to apply scientific thinking to the psychology of their everyday lives. By applying scientific thinking—thinking that helps protect us against our tendencies to make mistakes—we can better evaluate claims about both laboratory research and daily life. Students will emerge with the critical-thinking skills and open-minded scepticism they need to distinguish psychological misinformation from psychological information. The product is designed to encourage students to keep an open mind to new claims, but to insist on and evaluate evidence informing these claims.

Provides the framework to go from inquiry to understanding. Psychology: From Inquiry to Understanding, 3/e, teaches students how to test their assumptions, and motivates them to use scientific thinking skills to better understand the field of psychology in their everyday lives. By applying scientific thinking, students can more intelligently evaluate claims about both laboratory research and daily life. In the end, students will emerge with the psychological smarts, or open-minded skepticism, needed to distinguish psychological misinformation from credible, useful psychological information.
