We revisit Lipset ' s law, which posits a positive and significant relationship between income and democracy. Using dynamic and heterogeneous panel data estimation techniques, we find a significant and negative relationship between income and democracy: higher/lower incomes per capita hinder/trigger democratization. Decomposing overall income per capita into its resource and non-resource components, we find that the coefficient on the latter is positive and significant while that on the former is significant but negative, indicating that the role of resource income is central to the result.

Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. Advanced Automotive Fault Diagnosis is the only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition is fully updated to the latest technological developments. Two new chapters have been added – On-board diagnostics and Oscilloscope diagnostics – and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs; Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel; International Motor Vehicle qualifications such as C&G 3905; and ASE certification in the USA.

You won ' t be able to stop reading once you pick up Dr. John Hall ' s terrifying account, A New Breed: Satellite Terrorism in America. Dr. Hall ' s narration is based on true-life events and what you ' ll find will open your eyes to a completely new form of terrorism. Dr. Hall has treated numerous patients who have complained about voices in their heads, eventually being driven to a form of serious psychosis. In his book, he describes his relationship with his significant other, Mallory, a young, attractive woman with a bright future. Upon beginning a new profession, Mallory was suddenly struck down by unexplainable happenings: mind control, surveillance, stalking, and rape. Hall and others sacrificed themselves and their careers to bring her nightmare to an end. What happened to Mallory and what is happening to countless others? Hall ' s supposition is that we are faced with a type of terrorism that is unseen but just as deadly. Our government satellite surveillance systems are a new way for criminals to gain possession not only of our financial lives, but our most precious resource: Our minds. What can we do and who are these individuals who are trying to control the way the think, feel, act and what we do?

Drawing from Eastern and Western literatures, Heinrich Zimmer presents a selection of stories linked together by their common concern for the problem of our eternal conflict with the forces of evil. Beginning with a tale from the Arabian Nights, this theme unfolds in legends from Irish paganism, medieval Christianity, the Arthurian cycle, and early Hinduism. In the retelling of these tales, Zimmer discloses the meanings within their seemingly unrelated symbols and suggests the philosophical wholeness of this assortment of myth. Copyright © Libri GmbH.
