Biology Essentials For Dummies (9781119589587) was previously published as Biology Essentials For Dummies (9781118072677). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. Just the core concepts you need to score high in your biology course Biology Essentials For Dummies focuses on just the core concepts you need to succeed in an introductory biology course. From identifying the structures and functions of plants and animals to grasping the crucial discoveries in evolutionary, reproductive, and ecological biology, this easy-to-follow guide lets you skip the suffering and score high at exam time. Get down to basics — master the fundamentals, from understanding what biologists study to how living things are classified The chemistry of life — find out what you need to know about atoms, elements, molecules, compounds, acids, bases, and more Conquer and divide — discover the ins and outs of asexual and sexual reproduction, including cell division and DNA replication Jump into the gene pool — grasp how proteins make traits happen, and easily understand DNA transcription, RNA processing, translation, and gene regulation.

Diesel engines are installed in just about every yacht and in most large motorboats. This book explains how to prevent problems, troubleshoot and make repairs using safe techniques. It will help you save money on expensive bills for yard work you could do yourself. Diesels Afloat covers everything from how the diesel engine works to engine electrics, from fault finding to out of season lay-up. With this guide and your engine's manual you can be confident in dealing with any problem, and get the best performance from your boat.

This densely illustrated, hands-on guide to diesel engine maintenance, troubleshooting, and repair renders its subject more user-friendly than ever before. Finally, boatowners who grew up with gas engines can set aside their fears about tinkering with diesels, which are safer and increasingly more prevalent. As in other volumes in the International Marine Sailboat Library, every step of every procedure is illustrated, so that users can work from the illustrations alone. The troubleshooting charts in the second chapter--probably the most comprehensive ever published--are followed by system-specific chapters, allowing readers to quickly diagnose problems, then turn to the chapter with solutions. Diesel engine systems covered include: mechanical; oil; fresh- and raw-water cooling; low- and high-pressure fuel; exhaust; starting; charging; transmission and stern gear.

This unique volume of writings by educators in the field working with women's literacy reveals the many ways in which addressing women's empowerment through literacy continues to impact lives. Not only are teachers and learners in adult basic education (ABE), literacy and English language learning (ELL) classes affected, but also those who value and support women's learning and equity, and education for social change. Revelations More than half of the 3.6 million students in adult basic/literacy education (ABE) programs across the U.S. are women (Sticht, 2001). Research outlines many barriers for women pursuing basic education and literacy, and recommends using womanpositive approaches (Sheared, 1994). However, there exists little research on how educational systems and policies, instructional materials, and pedagogical practices best support the literacy and educational achievement of women literacy learners. Writings and curriculum by individual educators outline and describe innovative activities/ programs focused specifically on the needs of women learners (Cuban & Hayes, 1996; Hayes & Flannery, 2000; Miller & Alexander, 2004; Young & Padilla, 1990). In recent years, educators have been developing innovative curriculum to address such issues as trauma and violence (e.g., Take on the Challenge), workreadiness (e.g. Ready for Work), or women's issues in general (Making Connection). New Directions Empowering Women through Literacy: Voices from Experience is the first comprehensive collection of writing from the field by everyday educators who experience the joys and challenges, creativity and barriers to acknowledge or integrate innovative solutions to support women's learning needs in adult basic education and literacy settings. Mirroring the power of communitybased and grassroots organizations, this volume has had a remarkable history. It has emerged from five years of work by WE LEARN (Women Expanding Literacy Education Action Resource Network) to address the needs of literacy educators and students alike through the organization. The vibrant collective of the WE LEARN network provides consistent visibility for women's literacy issues, creates connections among educators and activists, supports selfefficacy among learners, encourages new research relevant to women in ABE, and develops and distributes womenfocused literacy materials and curriculum resources. It continues to be the only national U.S. organization directly addressing issues of adult women's literacy and the educational needs of women in ABE. We know you will enjoy this volume that provides an opportunity to hear from 47 contributors from around the world who reflect on their experiences with critical topics of adult literacy practices; how to empower women through literacy and current research based practice. From Belize to Australia, Brazil to Germany, and USA to Turkey, the voices of women engaged in empowerment are awaiting you through these pages. Literacy can change lives, how can we better reach those who desire this empowerment? Join us we explore the breadth of vision and knowledge captured within this groundbreaking volume. The Editors: Dr. Mev Miller and Dr. Kathleen P. King are coeditors of this volume within the Adult Education Series of Information Age Publishing. Mev Miller is the founder and director of WE LEARN, headquartered in Cranston, RI (www.litwomen.org). Kathy King is a professor of adult education at Fordham University's Graduate School of Education in New York City. They and 45 other contributors join together in this volume to celebrate the unheralded capacity of literacy's empowerment in women's lives.
