Here presented for the first time in English are the law codes of the Lombard kings who ruled Italy from the sixth to the eighth centuries. The documents afford unparalleled insight into the structure and values of Germanic society.

Society documents the empty internal spaces of a variety of London clubs, from the Kurdish Community Centre, to the Masons, the Fabian Society, The Indian Workers Association and the National Association of Flower Arrangers. The photographs provide a resonant and evocative portrait of rich hidden worlds operating within the city, revealing the interior spaces where communities gather. The series explores how people express their identity, their interests and concerns to create their own worlds, expressed through artifact and architecture. The work produces a strange tension between public and private, between beauty and the everyday. Bridget Smith is a photographer who has an on-going interest in architecture and the public realm and the emotional resonance within built form. She has an international reputation for photographing interiors and landscapes devoid of people. These places have often been sites of public leisure (cinema auditoria) or private fantasy (themed hotel rooms, glamour studios). In Society Bridget's work starts shifting towards a preoccupation with people and the worlds they create.

Awakening in a bleak landscape, Cass Dollar vaguely recalls enduring something terrible. Having no idea how many days—or weeks—have passed, she slowly realizes the horrifying truth: her daughter, Ruthie, has vanished. And with her, nearly all of civilization. Instead of winding through the once-lush hills, the roads today see only cannibalistic Beaters—people turned hungry for human flesh by a government experiment gone wrong. In a broken, barren California, Cass will undergo a harrowing quest to get Ruthie back. Few people trust an outsider—much less one who bears the telltale scars of a Beater attack—but she finds safety with an enigmatic outlaw, Smoke. And she'll need him more than ever when his ragged band of survivors learn that she and Ruthie have become the most feared, and desired, weapons in a brave new world. ...

Technology plays a critical role in the management of health care, the system, its delivery and its organizations. This book examines the role of technology in the delivery of health care by physicians and other health care workers, and their respective roles in the management of health care technology. The complexity of the health care environment and the difficulties in managing technology in general (and in health care in particular) makes this book a landmark exploration for the purpose of creating in-roads into the largely uncharted territory of health care technology. The chapters in this book will introduce the horizons that are open for scholarly pursuit in this area. Managing Technology in Healthcare has two main objectives. First, to provide the reader with an overview of the main issues of concern and the topics of study in managing technology in health care. Second, to offer the reader specific knowledge embedded in the eleven chapters of the book, covering a broad range of topics of interest to health care and to R&D/technology scholars and practitioners.

A complete guide for beginners, students, administrators, educators, designers, and everyone.

Teaching Recent Global History explores innovative ways to teach world history, beginning with the early 20th century. The authors' unique approach unites historians, social studies teachers, and educational curriculum specialists to offer historically rich, pedagogically innovative, and academically rigorous lessons that help students connect with and deeply understand key events and trends in recent global history. Highlighting the best scholarship for each major continent, the text explores the ways that this scholarship can be adapted by teachers in the classroom in order to engage and inspire students. Each of the eight main chapters highlights a particularly important event or theme, which is then complemented by a detailed discussion of a particular methodological approach. Key features include:• An overarching narrative that helps readers address historical arguments;• Relevant primary documents or artifacts, plus a discussion of a particular historical method well-suited to teaching about them;• Lesson plans suitable for both middle and secondary level classrooms;• Document-based questions and short bibliographies for further research on the topic. This invaluable book is ideal for any aspiring or current teacher who wants to think critically about how to teach world history and make historical discussions come alive for students.

A collection of eight critical essays on the classical tragedy, arranged in the chronological order of their original publication.

"The story of an immigrant family living in Brooklyn's Little Odessa, and the obstinate uncle who resists his family's and their adopted country's promise of a superior life"--
