The Co-operative Bank, Platform, smile and Britannia are trading names of The Co-operative Bank p.l.c., P.O. Box 101, 1 Balloon Street, Manchester M60 4EP.

This welcome second edition to the 2002 original presents the logical arithmetical or computational procedures within communications systems that will ensure the solution to various problems. The authors comprehensively introduce the theoretical elements which are at the basis of the field of algorithms for communications systems. Various applications of these algorithms are then illustrated with a focus on wired and wireless network access technologies. The updated applications will focus on 5G standards, and new material will include MIMO systems (Space-time block coding / Spatial multiplexing / Beamforming and interference management / Channel Estimation / mmWave Model); OFDM and SC-FDMA (Synchronization / Resource allocation (bit and power loading) / Filtered OFDM); Full Duplex Systems (Digital interference cancellation techniques).

The International Conference on Production Research has a good tradition: The first Conference was

held in Birmingham 1971 with 61 participants. With respect to the decision that the Conference should be held every second year, by this time the Conference has been held in the following countries: Birmingham (1971, UK), Copenhagen (1973, Denmark), Amhurst (1975, USA), Tokyo (1977, Japan), Amsterdam (1979, The Netherlands), Novi Sad (1981, Yugoslavia), Windsor (1983, Canada), Stuttgart (1985, Germany), and the next Conference will take place in Cincinnati (1987, USA). The number of submitted abstracts and papers was continuously increasing such that the Programme Committee of this actual 8th Conference on Production Research has been forced to introduce a further refereeing procedure. Each submitted abstract was presented to at least two referees. This resulted not only in a reduction of the number of presented full papers and poster contributions but, as the Programme Committee and the Editors hope, it led also to a considerable increase in the scientific quality of this 8th International Conference on Production Research. The preceding conference in Windsor, Canada, was dedicated to the topic: Production Research as a Means of Productivity Improvement. We don't believe that this statement has become untrue in the meanwhile.

This book constitutes the thoroughly refereed joint post proceedings of two international workshops, the 7th International Workshop on Data Privacy Management, DPM 2012, and the 5th International Workshop on Autonomous and Spontaneous Security, SETOP 2012, held in Pisa, Italy, in September 2012. The volume contains 13 full papers selected out of 31 submissions and 3 keynote lectures from the DPM workshop and 10 papers selected among numerous submissions from the SETOP workshop. The contributions from DPM cover topics from location privacy, citizens' privacy, privacy, authentication with anonymity, privacy in distributed systems, privacy policies, and automated privacy enforcement. The SETOP contributions provide a unique view of ongoing security research work in a number of emerging environments that are becoming part of the global ICT infrastructure, from content-centric to mobile and wireless networks. Also, some of them cover the key role of run-time enforcement in process and service security. The topics of SETOP papers include: security policy deployment; distributed intrusion detection; autonomous and spontaneous response; privacy policies; secure localization; context aware and ubiquitous computing; identity management.

This book is a printed edition of the Special Issue "Hopf Algebras, Quantum Groups and Yang-Baxter Equations" that was published in Axioms
