Alexander the Great. Genghis Kahn. Julius Caesar. Attila the Hun. Mao. Stalin. For thousands of years, the Stones have been hidden among us, giving a privileged few power to rule over masses, destroy empires and create new ones. It's near the end of the 21st century. When Matt Newmark was ten years old, his mother was killed in a vicious corporate assassination. For the last twelve years, he's been living off grid under the over-protective care of his father, running from dark forces, trying to stay alive. Now Matt finally has a chance to break away and start a new life. On the eve of a trip to Japan, he finds a dark rock in the shape of a claw. Life is never the same again. With the help of a Shinto priest, Matt discovers it's a Stone, a piece of ancient alien technology that gives him a sweeping view of history and control over time, matter and energy. But Matt is not alone. Mikal Ryzaard has a Stone of his own and a burning vision to eliminate suffering from the earth and bring back Paradise. With all the resources of a massive multinational corporation behind him, he tracks down Matt and makes him an offer. Join me or die.

"As always when I struggle to find the truth or something," the author writes, "I turn to story for illumination. And as I grapple with the angels of

difficult questions, I think of Jacob who saw a ladder of angels, reaching from earth to heaven... linking heaven to earth, the creation to the Creator, not separated from each other. Delight. At-one-ment." Just as Madeleine L'Engle finds in Jacob a companion for her journey, readers of this second volume in her Genesis Trilogy will delight in her companionship on their journey. But here answers to the book's many questions must finally be their own. The subjects are numerous and the questions vexing: what is the significance of angels, redemption, sexual identity, blessing, forgiveness, and the conflict of good versus evil? The reader will ponder these topics in the stimulating company of a biblical patriarch, a modern artist, and a powerful Presence known to spiritual travelers of all generations, the El Shaddai or God Almighty revealed in Genesis"--

The hilarious second book in a middle-grade fantasy trilogy about the magical rivers that run through the sewers of London and shape history in ways you'd never learn in school. Magic is real. History is about to be squashed. Now that Hyacinth Hayward knows about the enchanted rivers under London, she's determined to find out more. Unfortunately, London isn't cooperating. Instead, Hyacinth stumbles on a new adversary--a girl who is trying to steal all the ancient stones that keep the city in balance. A girl with glowing, magical fingers, whose entire body is tattooed with spells. A girl called Minnie Tickle. (What? Were you expecting something more . . . fearsome?) To stop her, Hyacinth will need help from stone itself--specifically, a giant talking lion statue and his talking statue friends. Can this enthusiastic but scattered company defeat Minnie before London sinks like a stone?

An examination of the literary and theological dynamics of the divine-human encounter as reflected in theophany narratives in the Hebrew Bible. The point of departure for this study is a type-scene analysis which reveals a common structure to theophany narratives. Beginning with the separation of the protagonist from human society, the text moves to a visual and verbal revelation by the Deity, and records a range of human reactions to the experience. Each of the texts concludes with a description of a more externalized reaction, which marks the carrying over of the experience into a larger societal framework. The analysis develops the underlying structural and contentual similarity among texts which have traditionally been understood as belonging to different literary genres. The discussion offers a nuanced treatment of the range of literary strategies employed by the narrative for addressing these elements. In addition to a detailed analysis of each of the above components of the type-scene, there is discussion of issues such as the idea of the lethal nature of the encounter and intertextual relations between the narratives. Cognitive archaeology is a relatively new interdisciplinary science that uses cognitive and psychological models to explain archeological artifacts like stone tools, figurines, and art. Squeezing Minds From Stones is a collection of essays from early pioneers in the field, like archaeologists Thomas Wynn and Iain Davidson, and evolutionary primatologist William McGrew, to 'up and coming' newcomers like Shelby Putt, Ceri Shipton, Mark Moore, James Cole, Natalie Uomini, and Lana Ruck. Their essays address a wide variety of cognitive archaeology topics, including the value of experimental archaeology, primate archaeology, the intent of ancient tool makers, and how they may have lived

and thought.

William accepts his fate with one condition—that Spartacus may join him. With their sights set on finding the Millennium Stone, the two companions venture into the treacherous kingdom full of witches, imps, undead, giants, and worse. With fate on their side, William and Spartacus meet an orphaned pickpocket, an amazing swordsman turned frog, and an incredible crystal dragon. Together, the unlikely friends must valiantly fight the mysterious darkness that threatens to consume everything. Now only time will tell if they will unearth the stone before it is too late for all of them. In this charming young-adult adventure, a boy and his brave dog embark on a journey to find a magical stone that they hope will help save their kingdom from a tragic ending.
