This 1936 book formed part of The Craftsman Series, which aimed to give secondary school age children an insight into 'the development of constructive activities in the sphere of material things'. The narrative gives an account of how the author established his own smithy and became involved in the creation of decorative ironwork.

This unique annotated bibliography lists nearly 300 books on the art of blacksmithing. It is divided into four parts: Practical Blacksmithing, Specialized Areas of Blacksmithing, Historical Background of the Profession, and Products of the Forge. Part 1 deals with the technical side of blacksmithing: the texts, manuals, and courses aimed at teaching the basic processes. It includes reference books on the materials of blacksmithing and on metallurgy. Part 2 presents the more specialized and advanced processes of blacksmithing, including ornamental ironwork, farm smithing, industrial forging, and bladesmithing. It also includes materials related to pattern-welded Damascus steel. The listings in part 3 deal with blacksmithing as a literary and historical subject. The primary focus of these books is on the traditions, lore, and descriptions of the trade. In these books the processes, tools, and products are of only secondary importance. Part 4 lists books that treat the products of the forge, a wide-ranging area that covers everything from tools and utensils to architectural works. A special feature of this section is a chapter emphasizing individual smiths and their works. The book also contains two indexes, one an alphabetical listing by author and one an alphabetical listing by title.

Set in a pre-Viking Norway and Denmark, this action filled novel follows the training and challenges faced by Diccon, a village smith's apprentice. There's a murdered stranger, romance, magic, traditional folklore, a sidekick whose magic only works when he's drunk, battles, a power hungry warlord, and a tuxedo kitten who saves the day.

"This original haunted house tale, with a unique plot and compellingly vivid characters, moves from uneasy to creepy to all-out 'keep the lights on' terror." □Library Journal, starred review. In the tumultuous summer of 1974, in the shadowy rooms of a rundown mansion in Rhode Island, renowned psychologist Dr. Piers Preis-Herald brings together a group of seven collegiate researchers to study the inner lives of man's closest relative—the primate. They set out to teach their subject, who would eventually be known to the world as Smithy, American Sign Language. But as the summer deepens and the history of the mansion manifests, the messages signed by their research subject become increasing spectral. Nearly twenty-five years after the Smithy Project ended in tragedy at Trevor Hall, questions remain: Was Smithy a hoax?
