The Elements of Modern Architecture - Thames & Hudson

Modernism calls for logic, rational expression and the application of universal principles. The defining principle of modern architecture is known as form follows function, the rule that architecture and design be driven purely by required functionality and not by artistic expression.

19 Characteristics of Modern Architecture - Simplicable

The basic principles of modern architecture include form following function, clean lines, and a lack of ornamentation. Eventually, modern principles became too cold for everyday living due to an excess of space and the stark nature of the building materials.

File Type PDF The Elements Of Modern

An incomparable guide to architectural styles across the centuries and around the world. Modeled after an architect's plein air sketchbook, the volume features hundreds of detailed drawings by esteemed architectural illustrator Robbie Polley alongside incisive and informative descriptions. This unique guidebook takes readers from Europe and the Americas to Egypt, China, and India. It covers a host of historical and contemporary architectural styles, from ancient and classical to Pre-Columbian, Romanesque, Renaissance, Palladian, art nouveau, Brutalist, and biomorphic. It describes the histories and characteristics of the building traditions of each era and region of the world, and looks at key architectural elements such as buttresses, spandrels, curtain walls,

conditioning became widely available—Daniel Barber brings to light a vibrant and dynamic architectural discussion involving design, materials, and shading systems as means of interior climate control. He looks at projects by well-known architects such as Richard Neutra, Le Corbusier, Lúcio Costa, Mies van der Rohe, and Skidmore, Owings, and Merrill, and the work of climate-focused architects such as MMM Roberto, Olgyay and Olgyay, and Cliff May. Drawing on the editorial projects of James Marston Fitch, Elizabeth Gordon, and others, he demonstrates how images and diagrams produced by architects helped conceptualize climate knowledge, alongside the work of meteorologists, physicists, engineers, and social scientists. Barber describes

how this novel type of environmental media catalyzed new ways of thinking about climate and architectural design. Extensively illustrated with archival material, *Modern Architecture and Climate* provides global perspectives on modern architecture and its evolving relationship with a changing climate, showcasing designs from Latin America, Europe, the United States, the Middle East, and Africa. This timely and important book reconciles the cultural dynamism of architecture with the material realities of ever-increasing carbon emissions from the mechanical cooling systems of buildings, and offers a historical foundation for today ' s zero-carbon design.

In 1896, Otto Wagner's "Modern

Architecture" shocked the European architectural community with its impassioned plea for an end to eclecticism and for a "modern" style suited to contemporary needs and ideals, utilizing the nascent constructional technologies and materials. Through the combined forces of his polemical, pedagogical, and professional efforts, this determined, newly appointed professor at the Vienna Academy of Fine Arts emerged in the late 1890s - along with such contemporaries as Charles Rennie Mackintosh in Glasgow and Louis Sullivan in Chicago - as one of the leaders of the revolution soon to be identified as the "Modern Movement." Wagner's historic manifesto is now presented in a new English translation - the first in almost ninety years - based on the

expanded 1902 text and noting emendations made to the 1896, 1898, and 1914 editions. In his introduction, Dr. Harry Mallgrave examines Wagner's tract against the backdrop of nineteenth-century theory, critically exploring the affinities of Wagner's revolutionary élan with the German eclectic debate of the 1840s, the materialistic tendencies of the 1870s and 1880s, and the emerging cultural ideology of modernity. Modern Architecture is one of those rare works in the literature of architecture that not only proclaimed the dawning of a new era, but also perspicaciously and cogently shaped the issues and the course of its development; it defined less the personal aspirations of one individual and more the collective hopes and dreams of a generation facing the sanguine

File Type PDF The Elements Of Modern Architecture Understanding promise of a new century

In the nineteenth-century paradigm of architectural organicism, the notion that buildings possessed character provided architects with a lens for relating the buildings they designed to the populations they served. Advances in scientific race theory enabled designers to think of “ race ” and “ style ” as manifestations of natural law: just as biological processes seemed to inherently regulate the racial characters that made humans a perfect fit for their geographical contexts, architectural characters became a rational product of design. Parallels between racial and architectural characters provided a rationalist model of design that fashioned some of the most influential national building styles of the past,

from the pioneering concepts of French structural rationalism and German tectonic theory to the nationalist associations of the Chicago Style, the Prairie Style, and the International Style. In *Building Character*, Charles Davis traces the racial charge of the architectural writings of five modern theorists—Eugene Emmanuel Viollet-le-Duc, Gottfried Semper, Louis Sullivan, Frank Lloyd Wright, and William Lescaze—to highlight the social, political, and historical significance of the spatial, structural, and ornamental elements of modern architectural styles.

lenses to explain the rich history of Japanese architectural developments from the 1920s foundation of modern architecture to contemporary permutations of modern and post-modern architecture. The book introduces the diversity of Japanese architecture and traces the evolution of Japanese architecture in the context of domestic and international developments. It examines the relationship between architecture and nature, and explores various approaches to craft and material. Finally, this new book considers tensions between refinement and ostentation in architectural expression. Of interest to students of architecture, and anyone with an interest in Japanese post-war culture and superbly illustrated with 95 colour images.
